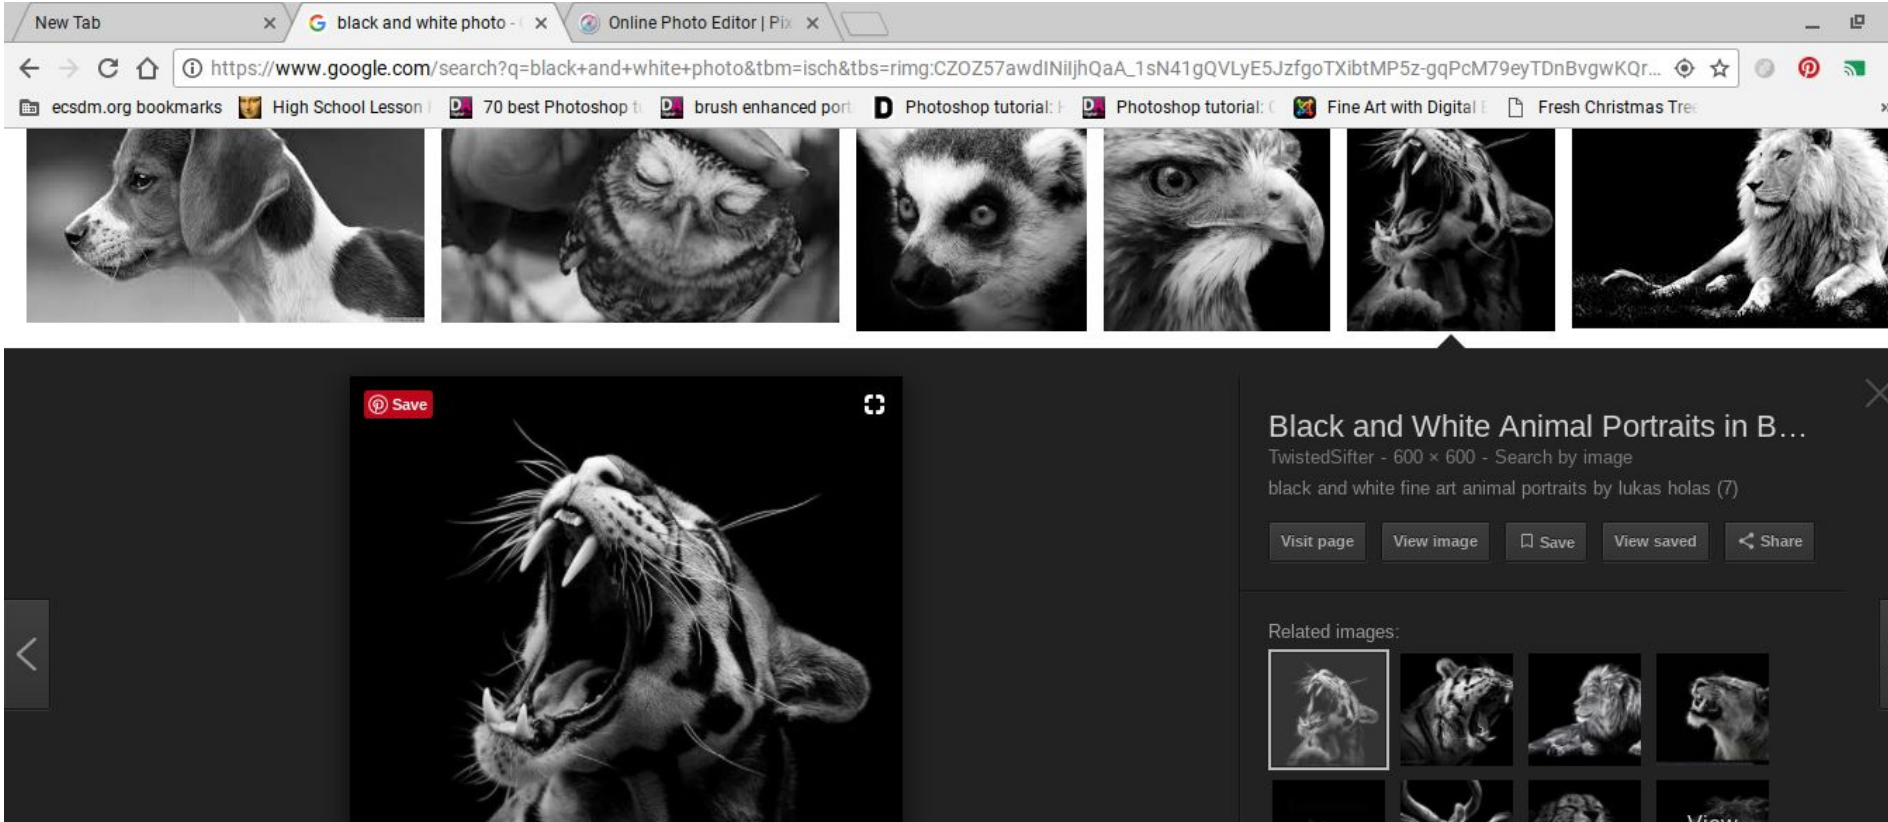
Coloring graphic animals

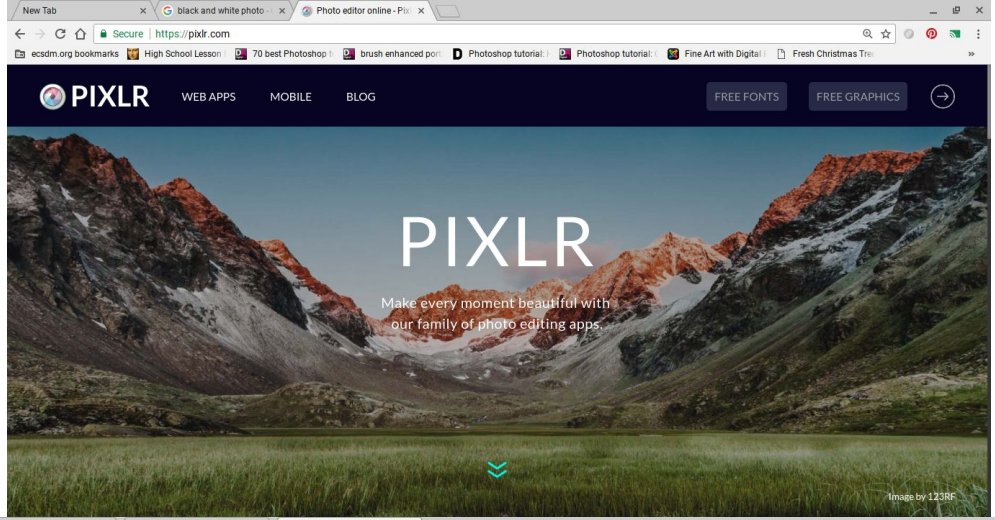
Mrs. Ras

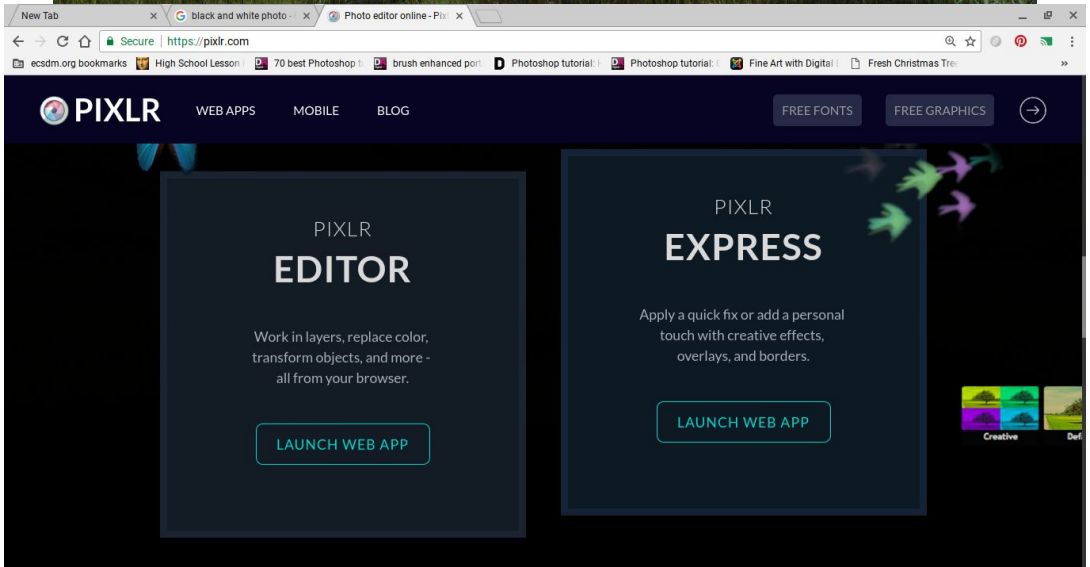
Go to google and find a black and white image or a animal. You want something very bold and with alot of Value ie lights and darks, those work the best for this project
Right click> save image



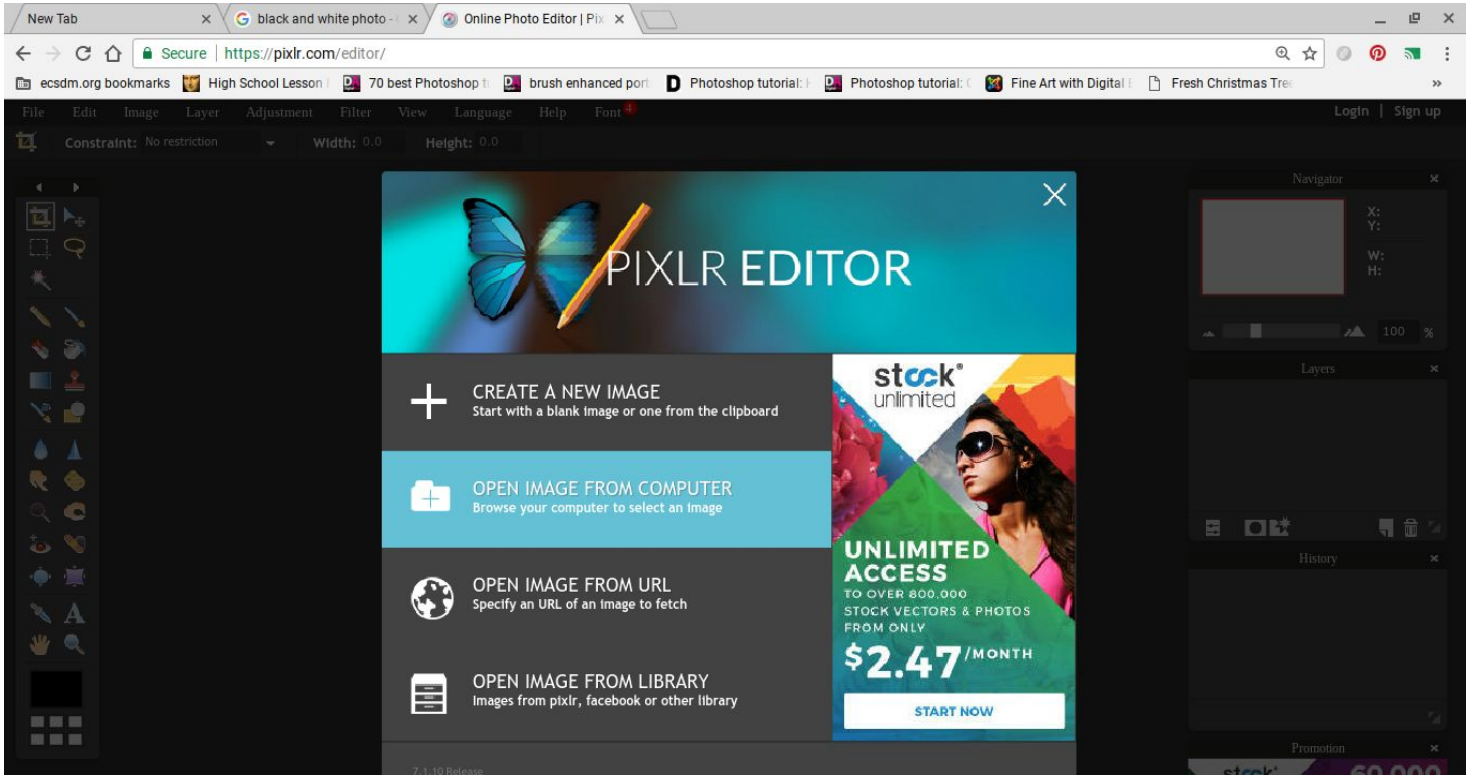
Go to https://www.pixlr.com/

Scroll down and launch Pixlr Editor

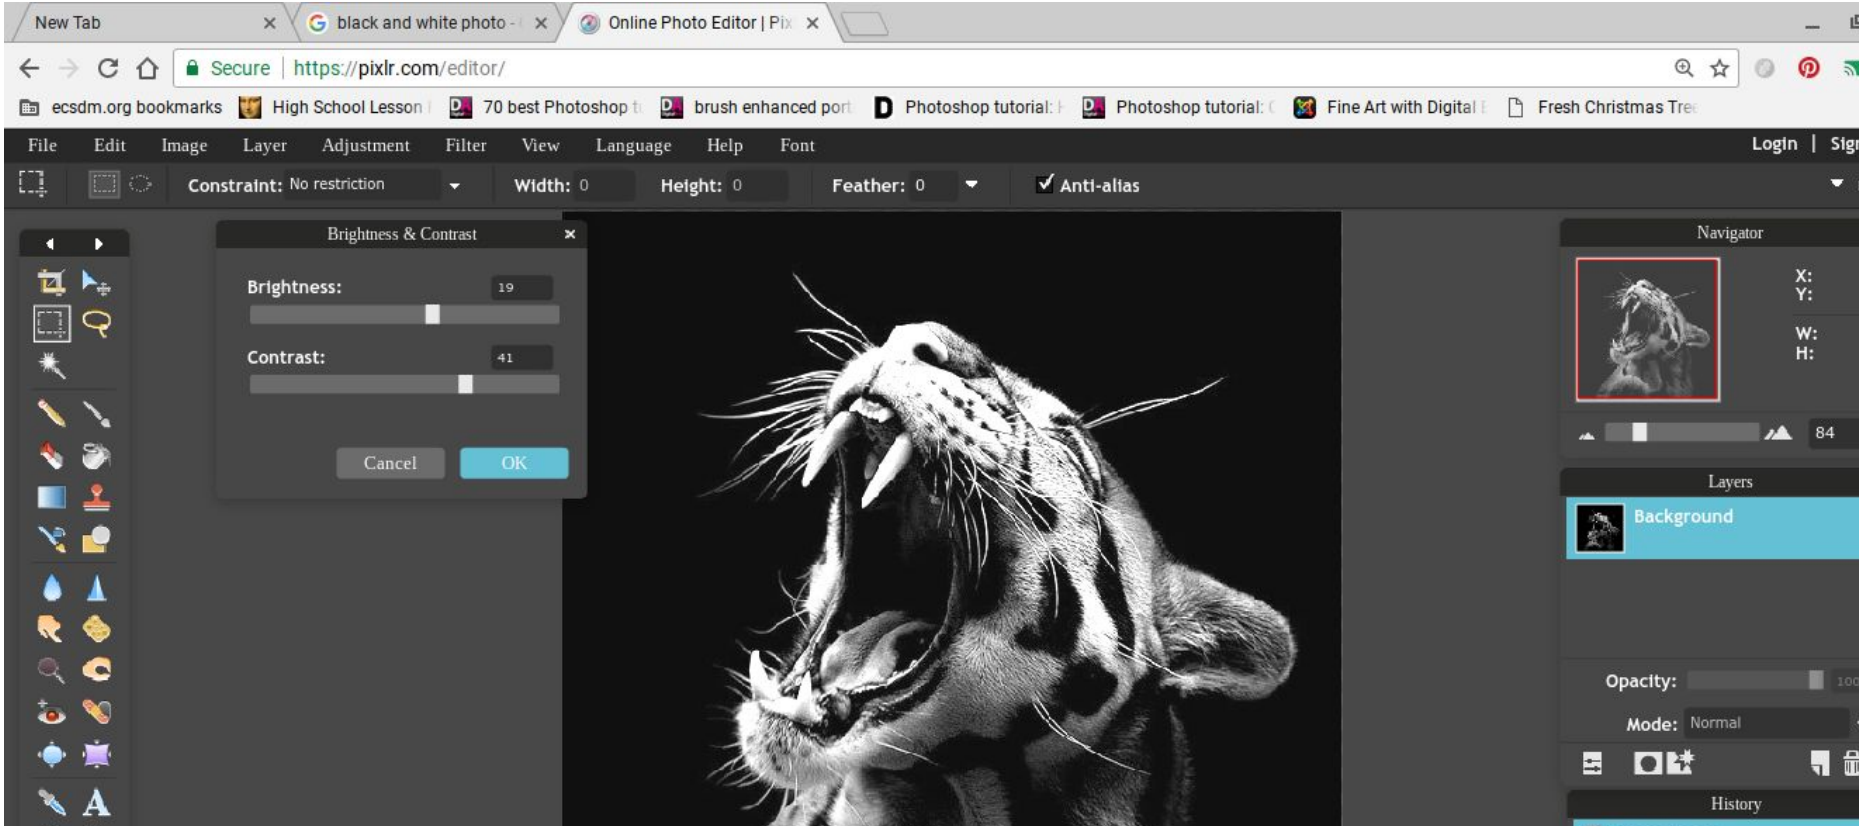




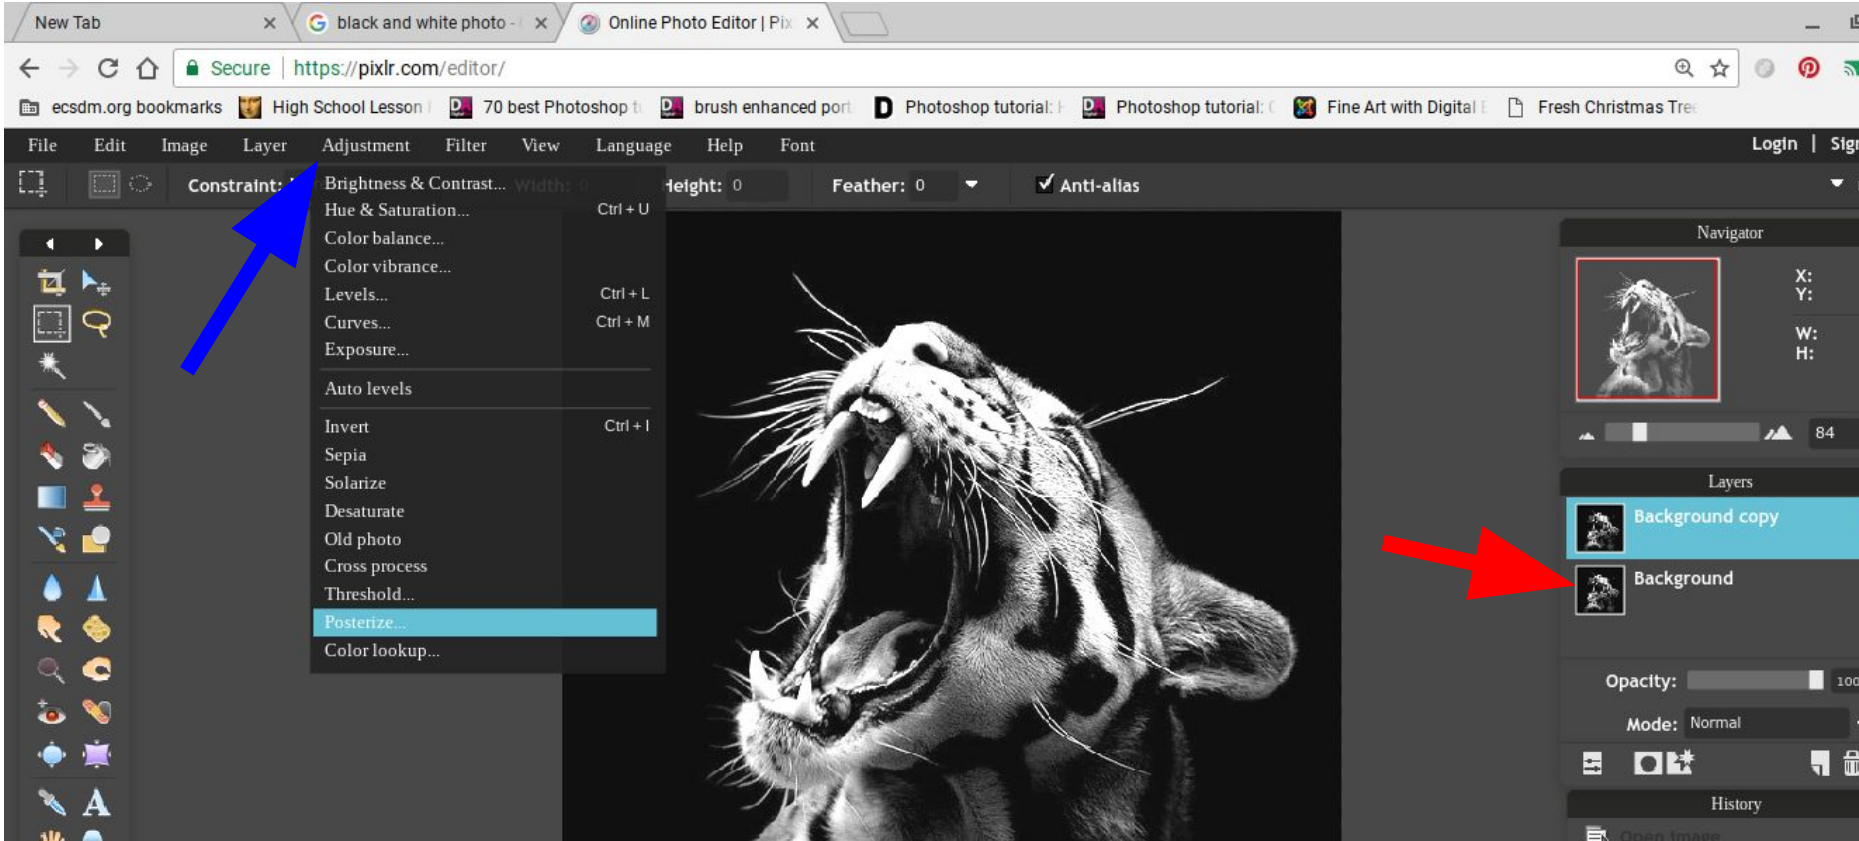
Open image from computer. Choose the image you saved



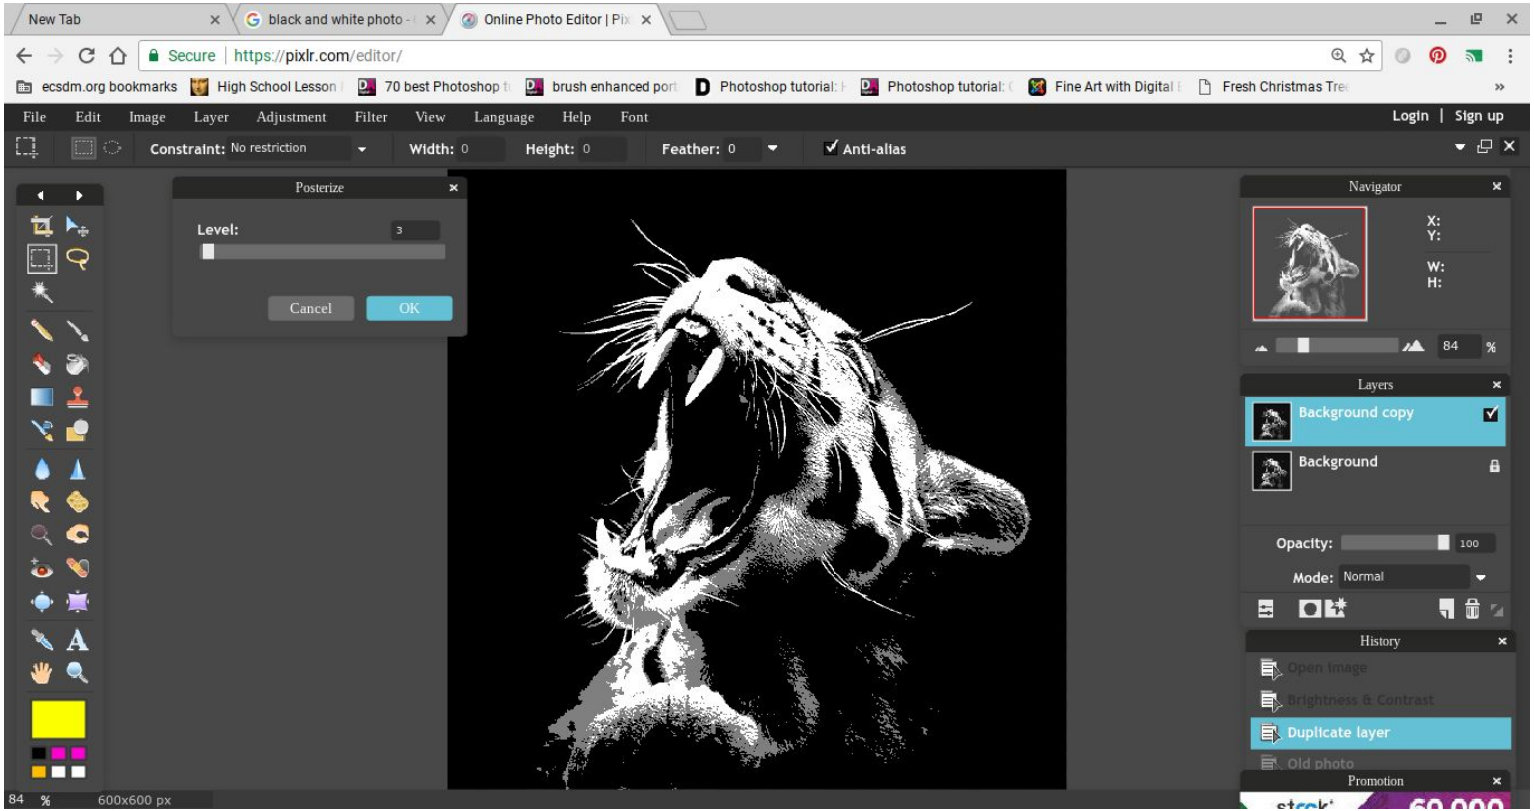
Adjustment> brightness and contrast
Makes sure there are a lot of lights and darks



1) Right click on the layer and duplicate layer
2) On that new layer Adjustment > posterize



Choose 5 or less.



Using the magic wand tool select a shade. Like the medium dark etc. remember by holding shift you can select multiple things.
Add a new layer to paint in
