

Digital painting flower

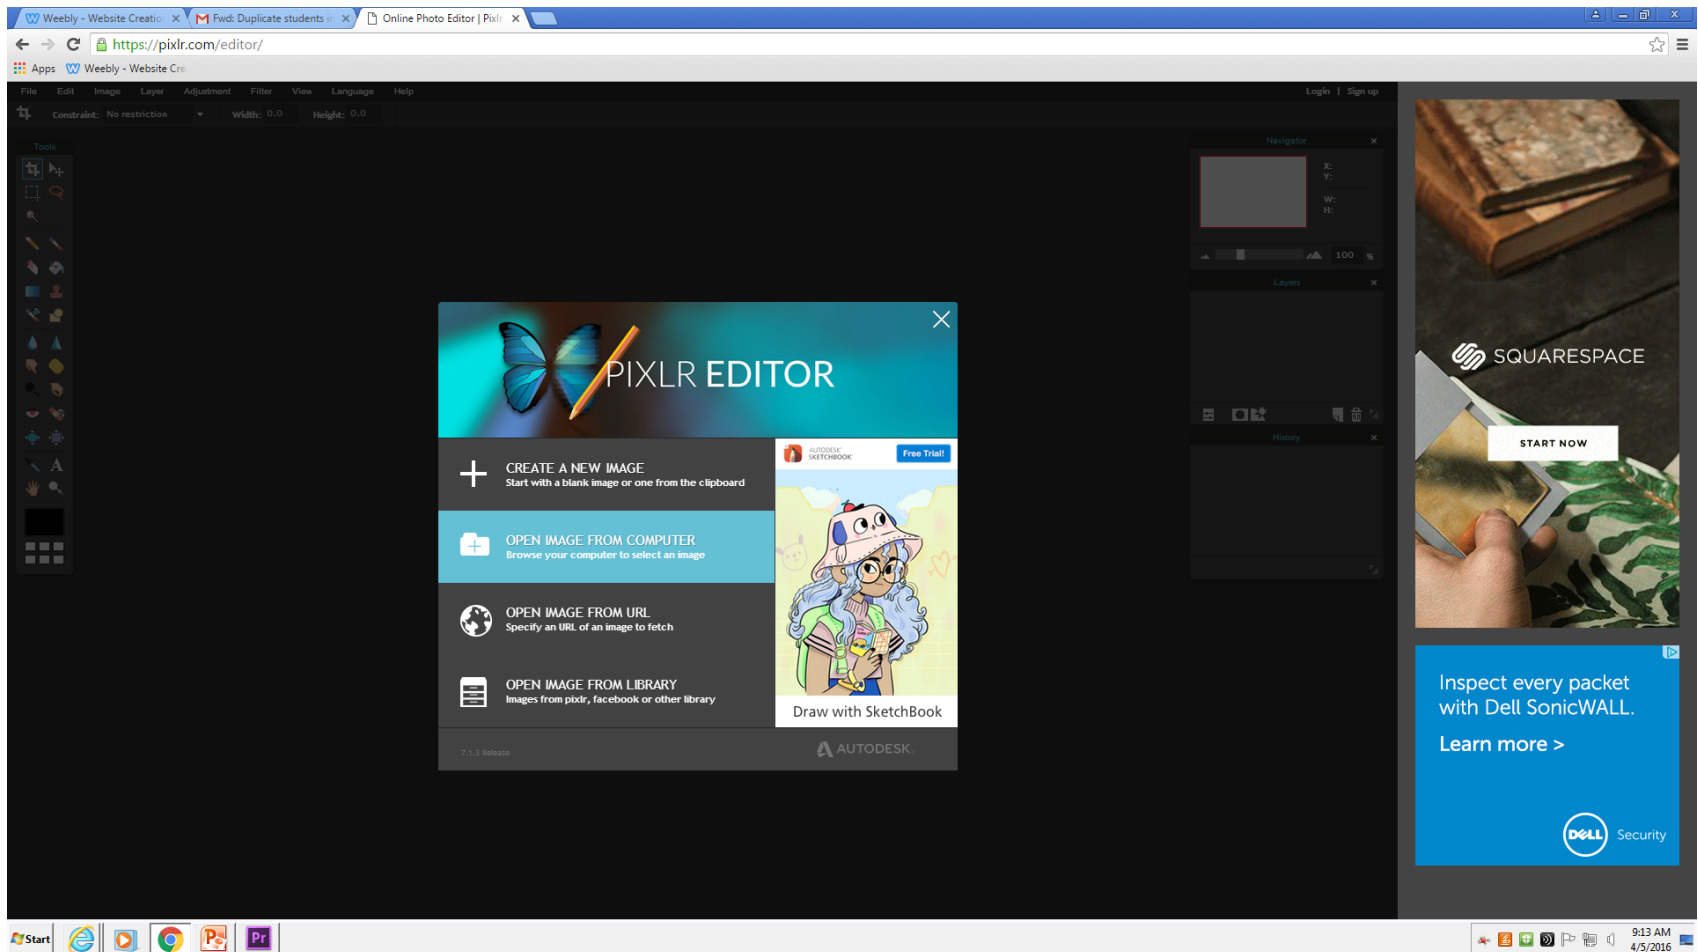

# Find a line drawing of a flower

- Save it to your computer
- Make sure it is a large, clear image!!!

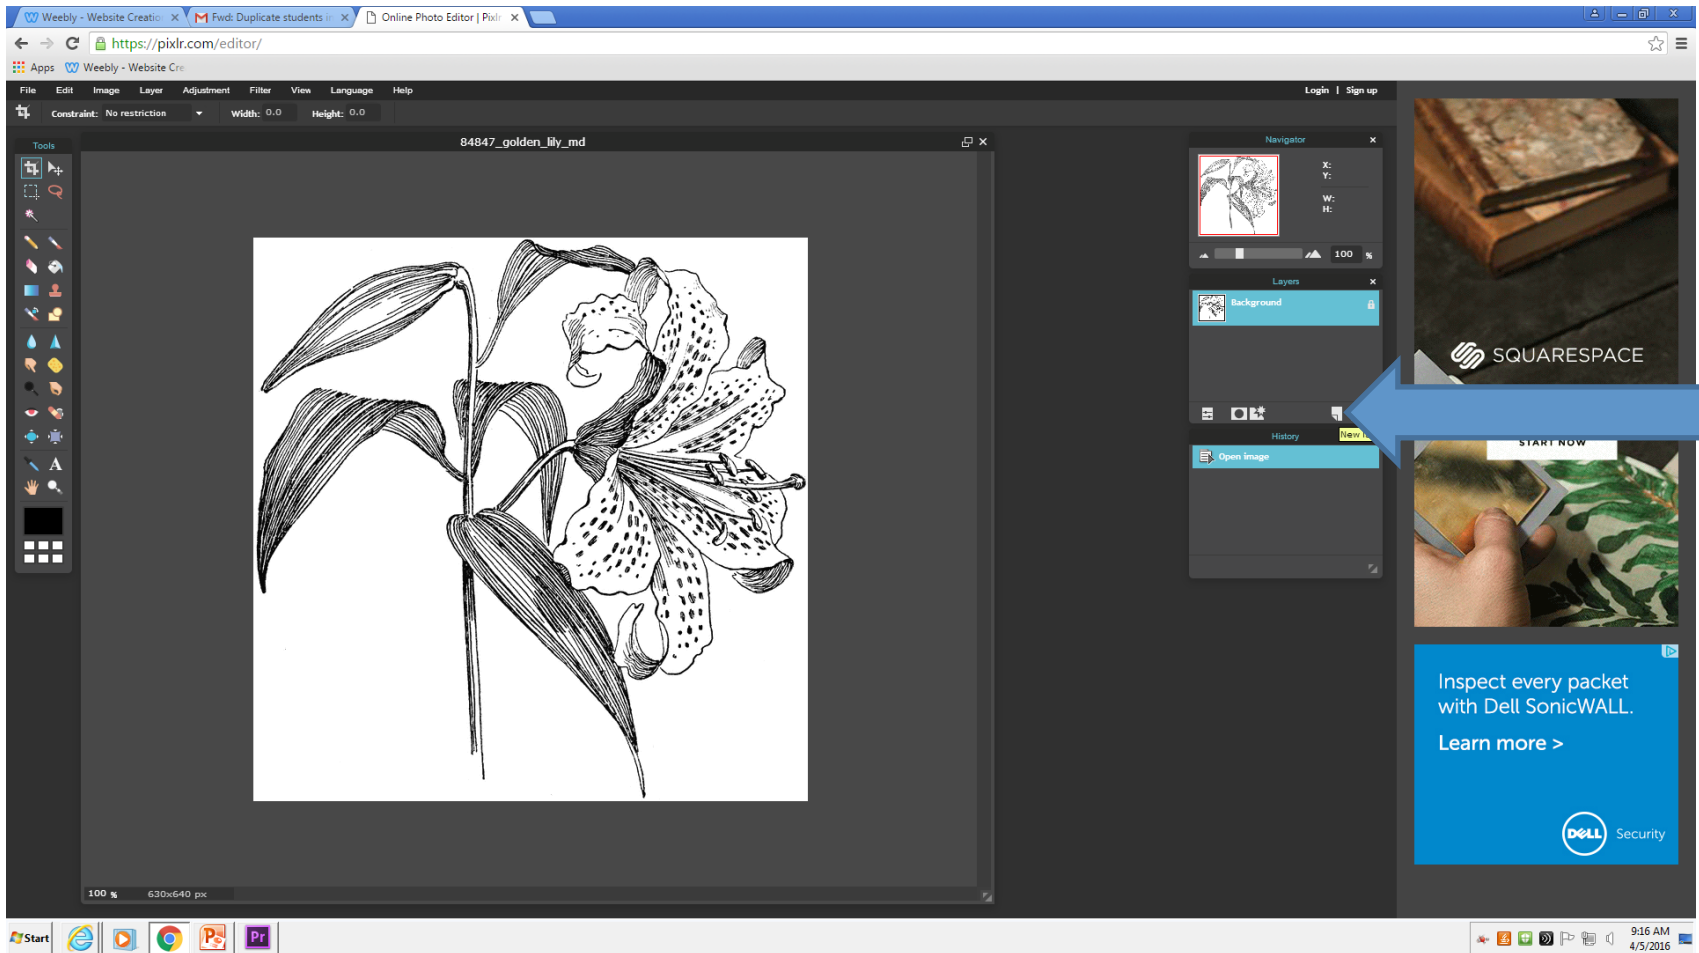

Go to <https://pixlr.com/web>  
Click on the turquoise “launch web  
app” button

The screenshot shows a web browser window with the URL <https://pixlr.com/web>. The page features a dark blue header with the Pixlr logo and navigation links: WEB APPS, MOBILE, DESKTOP, BLOG, MADE WITH PIXLR, and LEGACY. On the right, there are links for LOGIN and SIGN UP FREE. The main content area has a large background image of a city street at dusk. In the center, the text reads: "Our most popular free web-based photo editor makes editing photos easy. Apply quick fixes, overlays, filters, and stickers to make any photo beautiful." Below this text is a prominent turquoise button labeled "Launch Web App". Underneath the button is a horizontal strip of eight small thumbnail images, each with a name below it: Adrian, Alex, Ian, Ingrid, Janine, Merissa, Ronny, and Roxy. At the bottom of the page, there is a section for "PIXLR EDITOR" featuring a butterfly logo and the text: "A robust browser photo editor, for all your editing needs. With Pixlr Editor you have full control over your images including layers and effects." Below this text is another turquoise button labeled "Launch Web App". The browser's taskbar at the bottom shows various application icons, including Start, Internet Explorer, Google Chrome, and Adobe Photoshop.

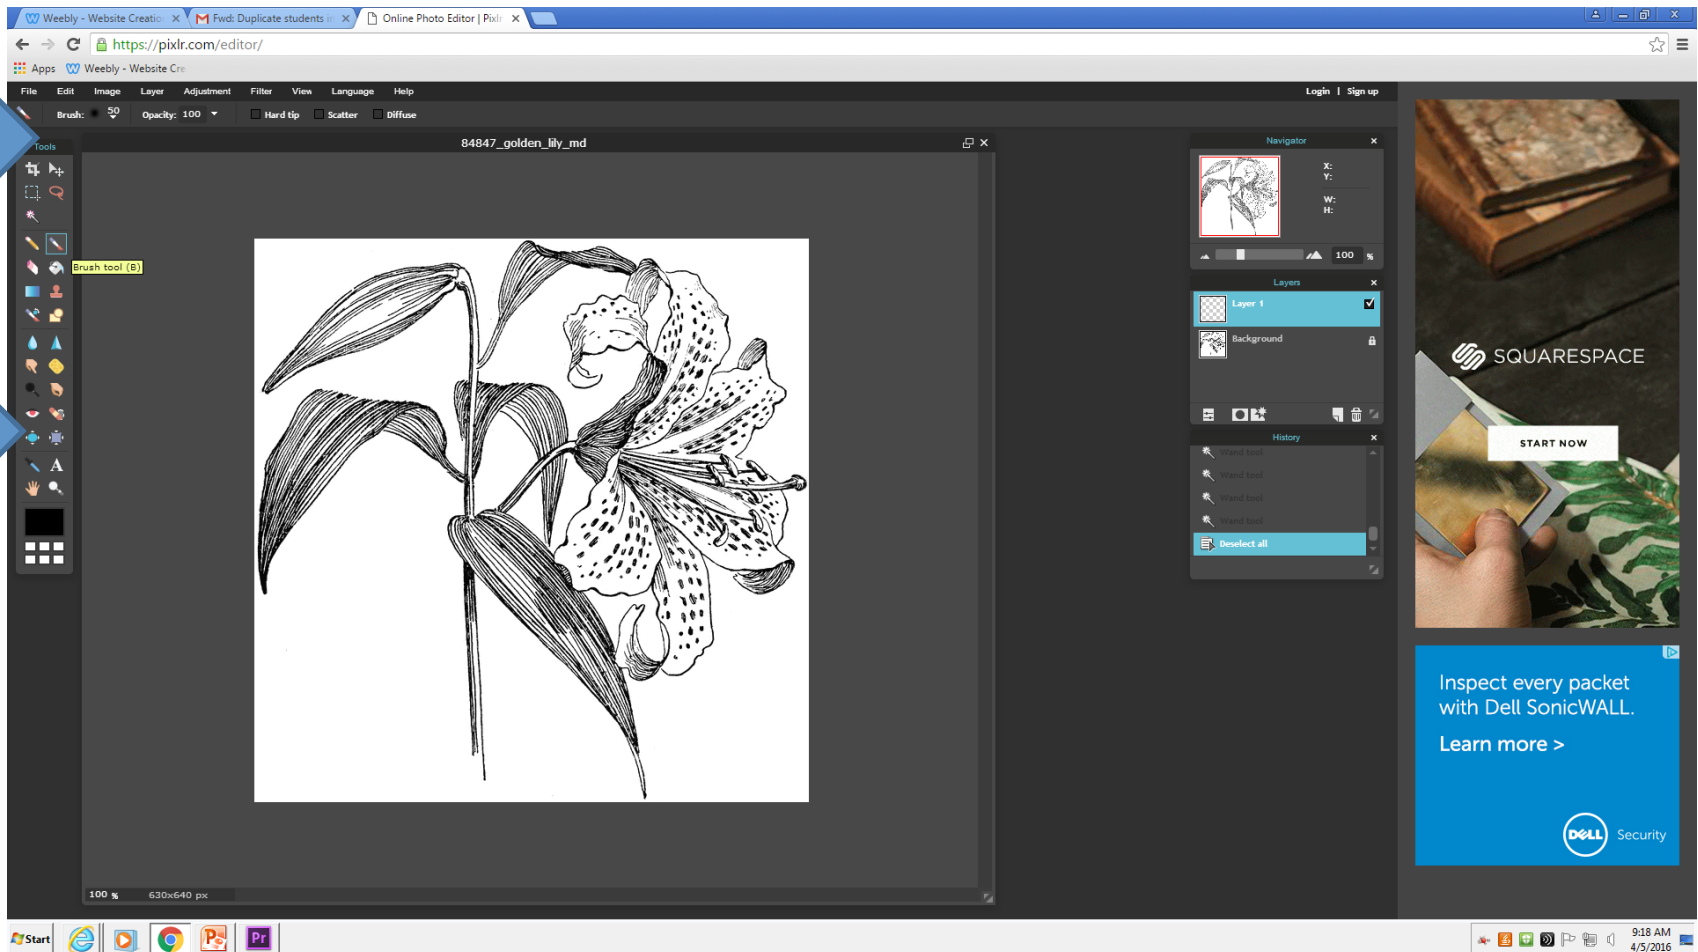

- 1) Choose Open image from computer
- 2) Open the jpeg image of your line drawing that you saved!

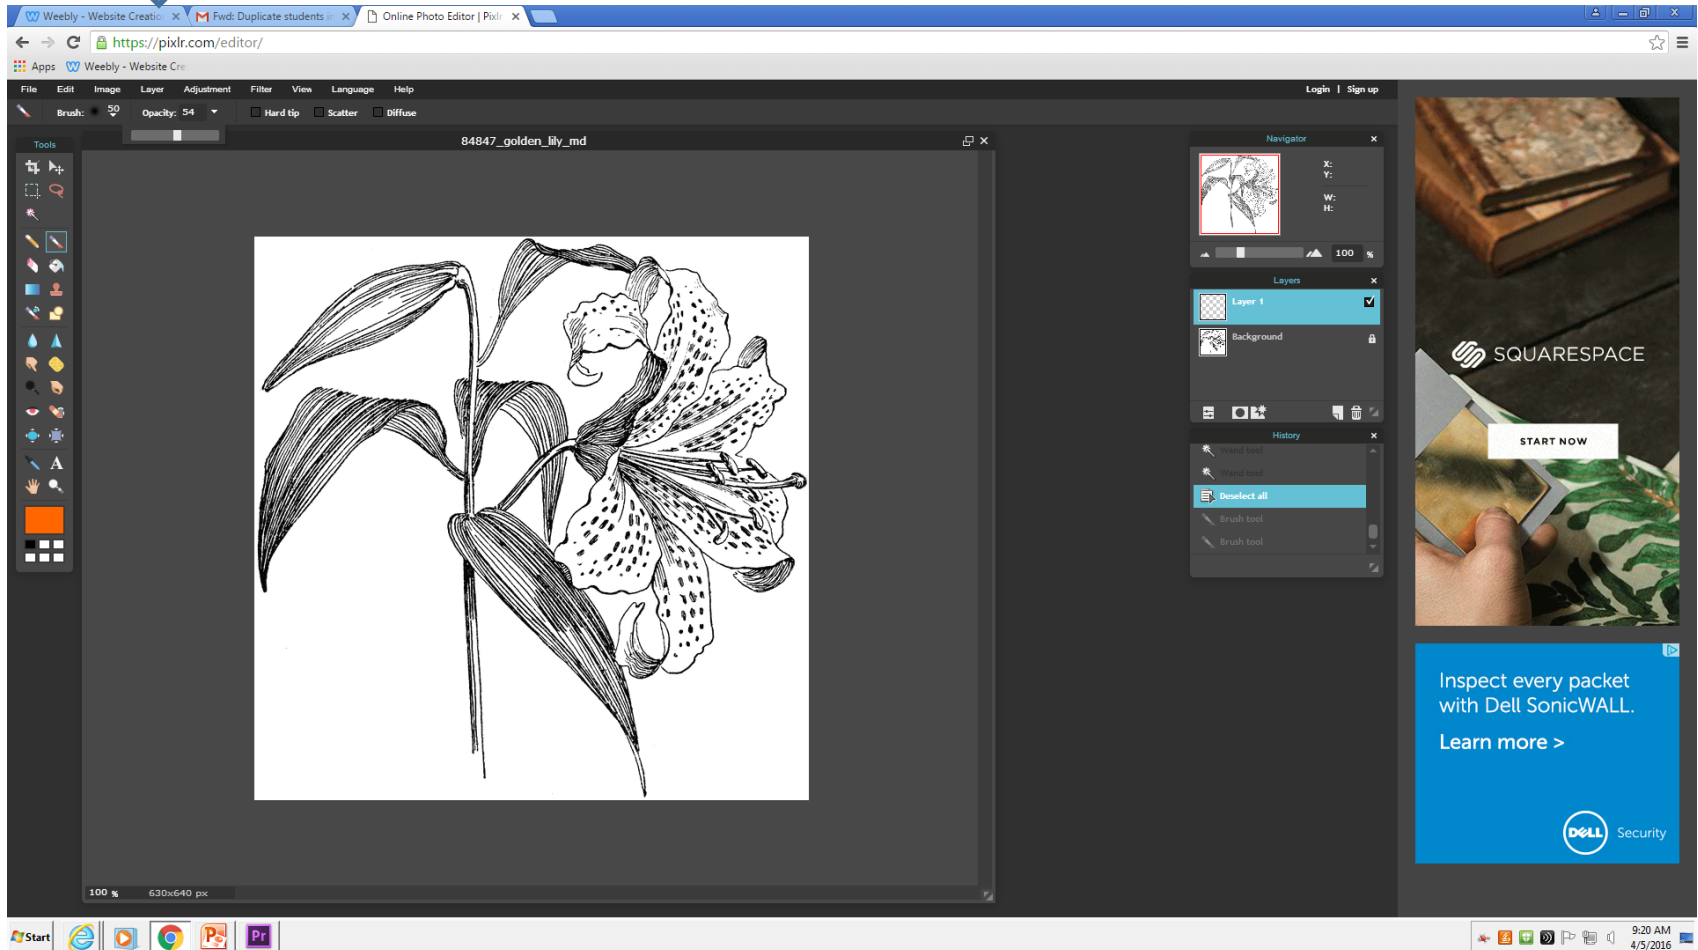

# Add a new layer

On new layer choose the paint brush  
click on the color swatch and choose a  
color for your petals

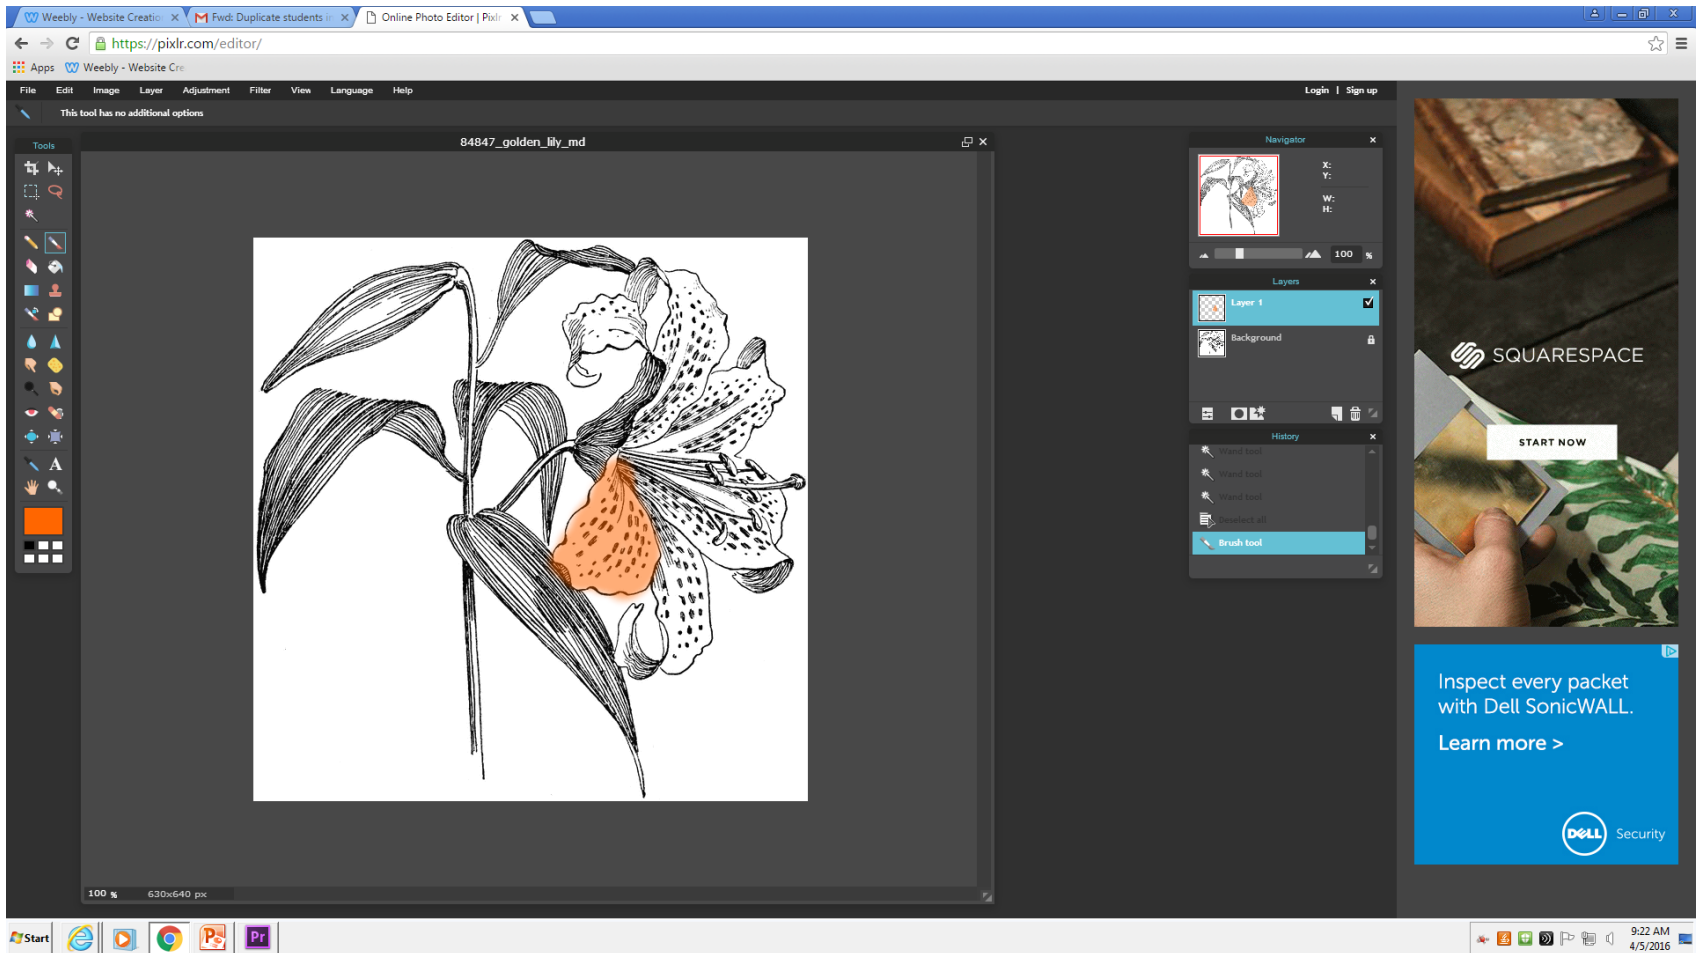

Lower the opacity of the paint brush so that you can add more paint to one end of the petal to create a gradient.

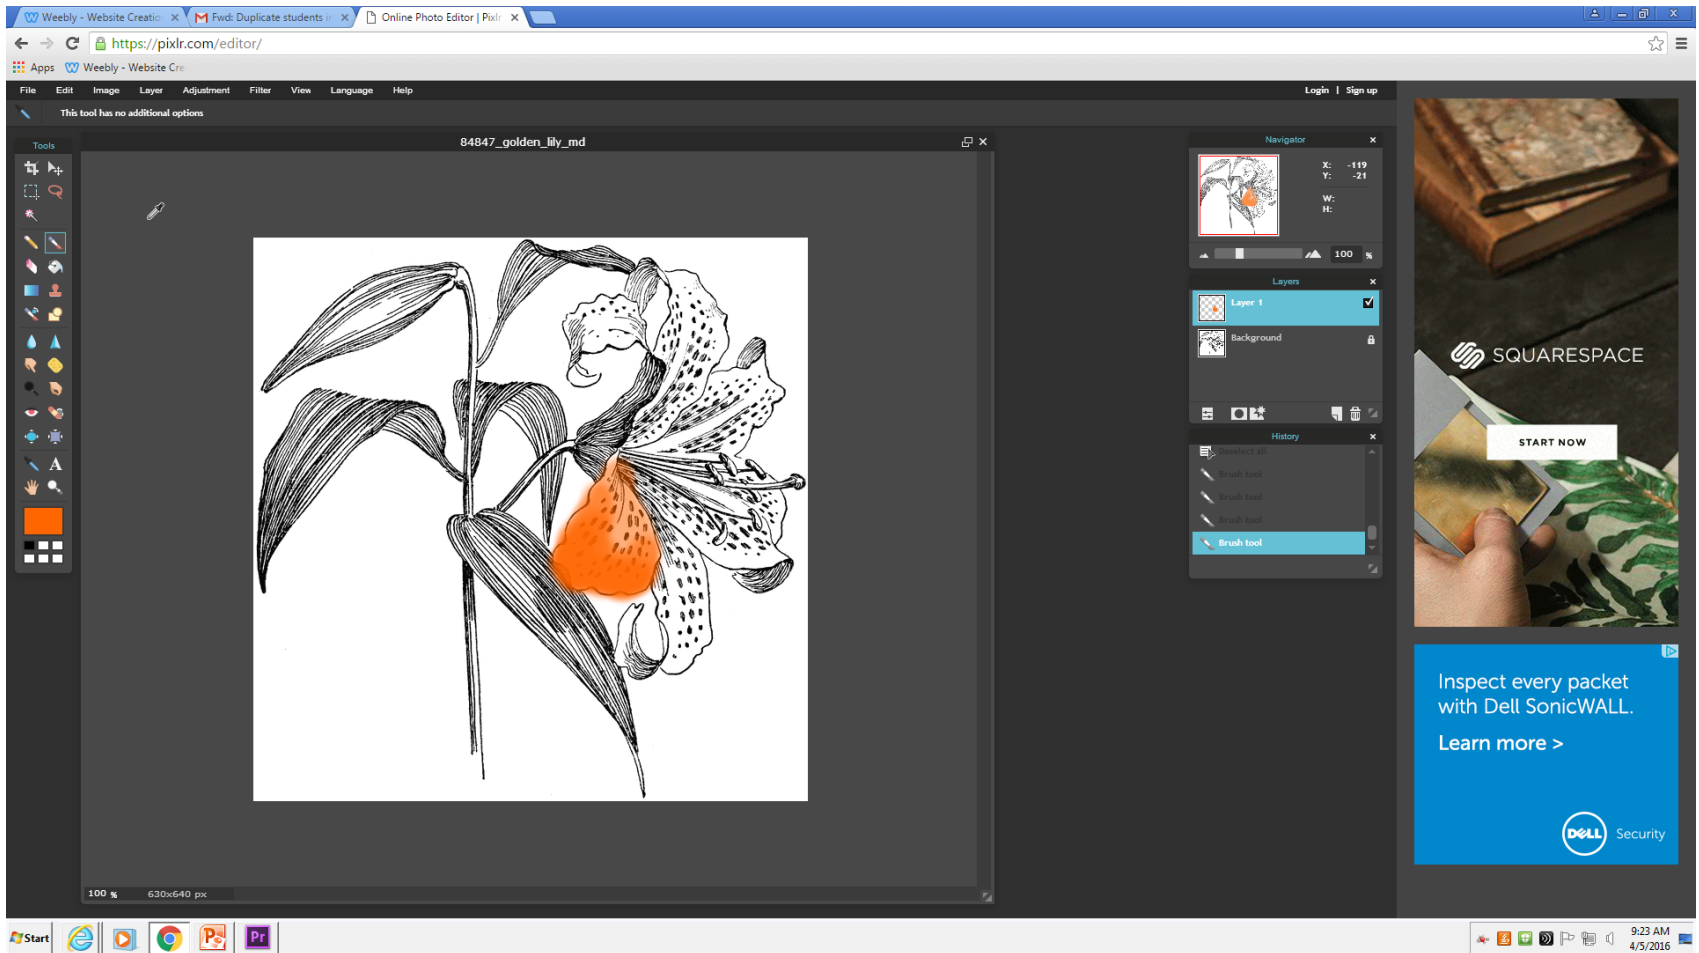

# Click hold down and paint one entire petal

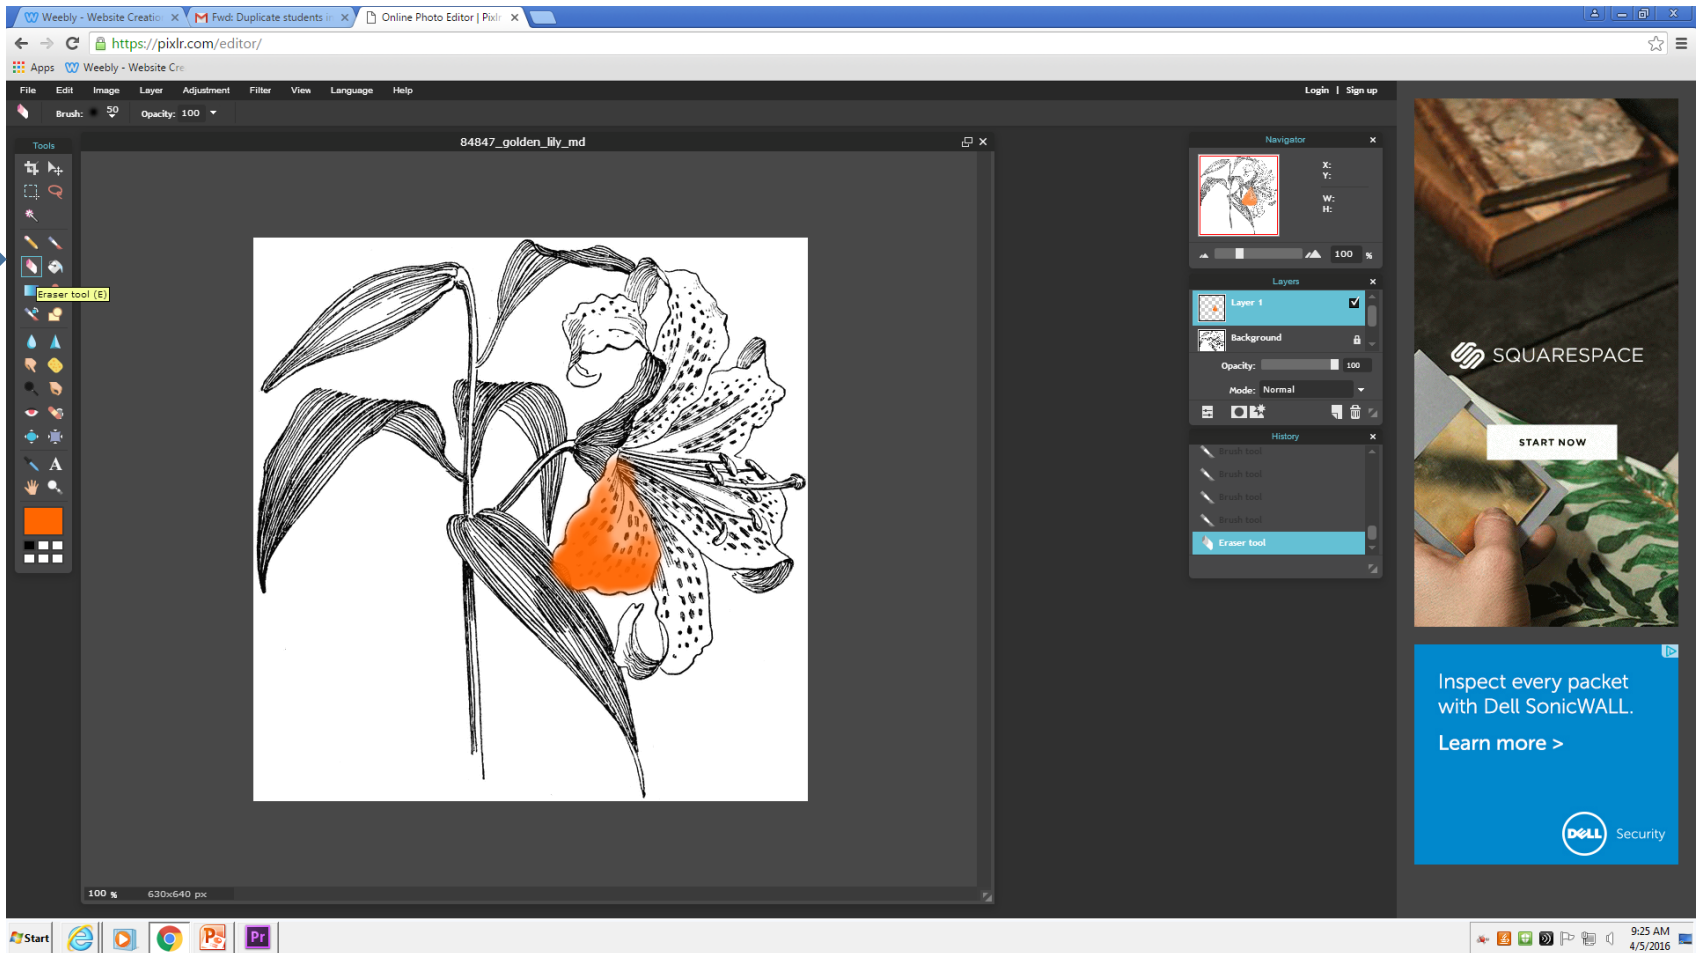

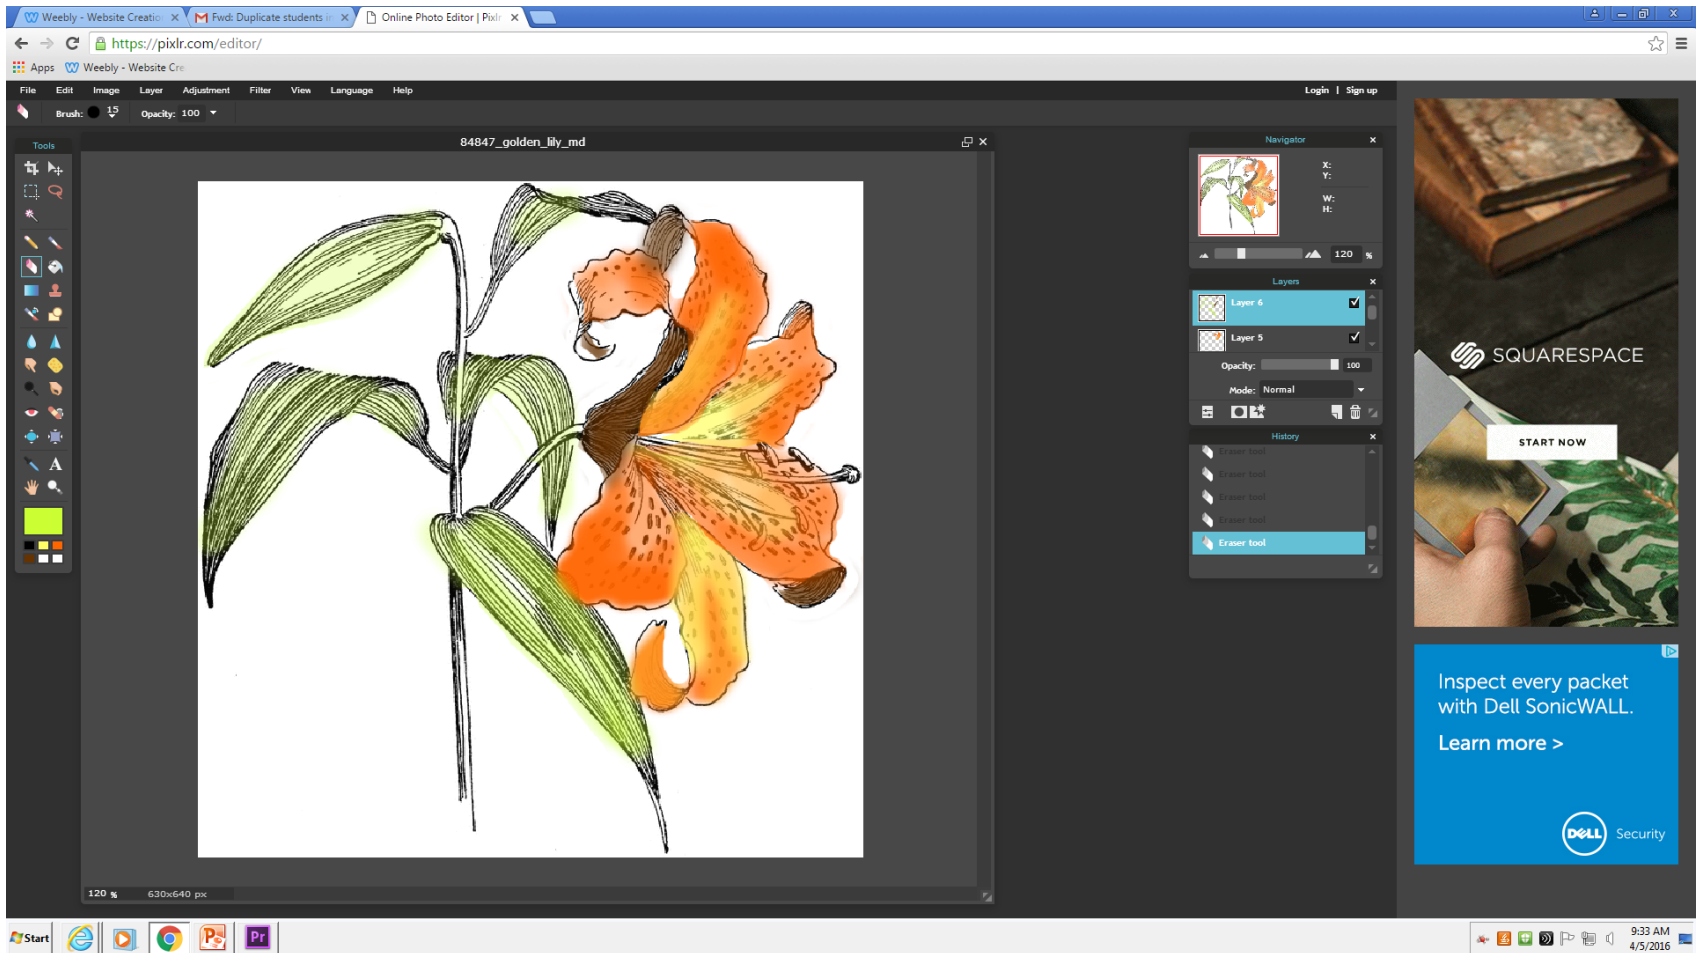

# Go over again and again one end of the petal to create gradient

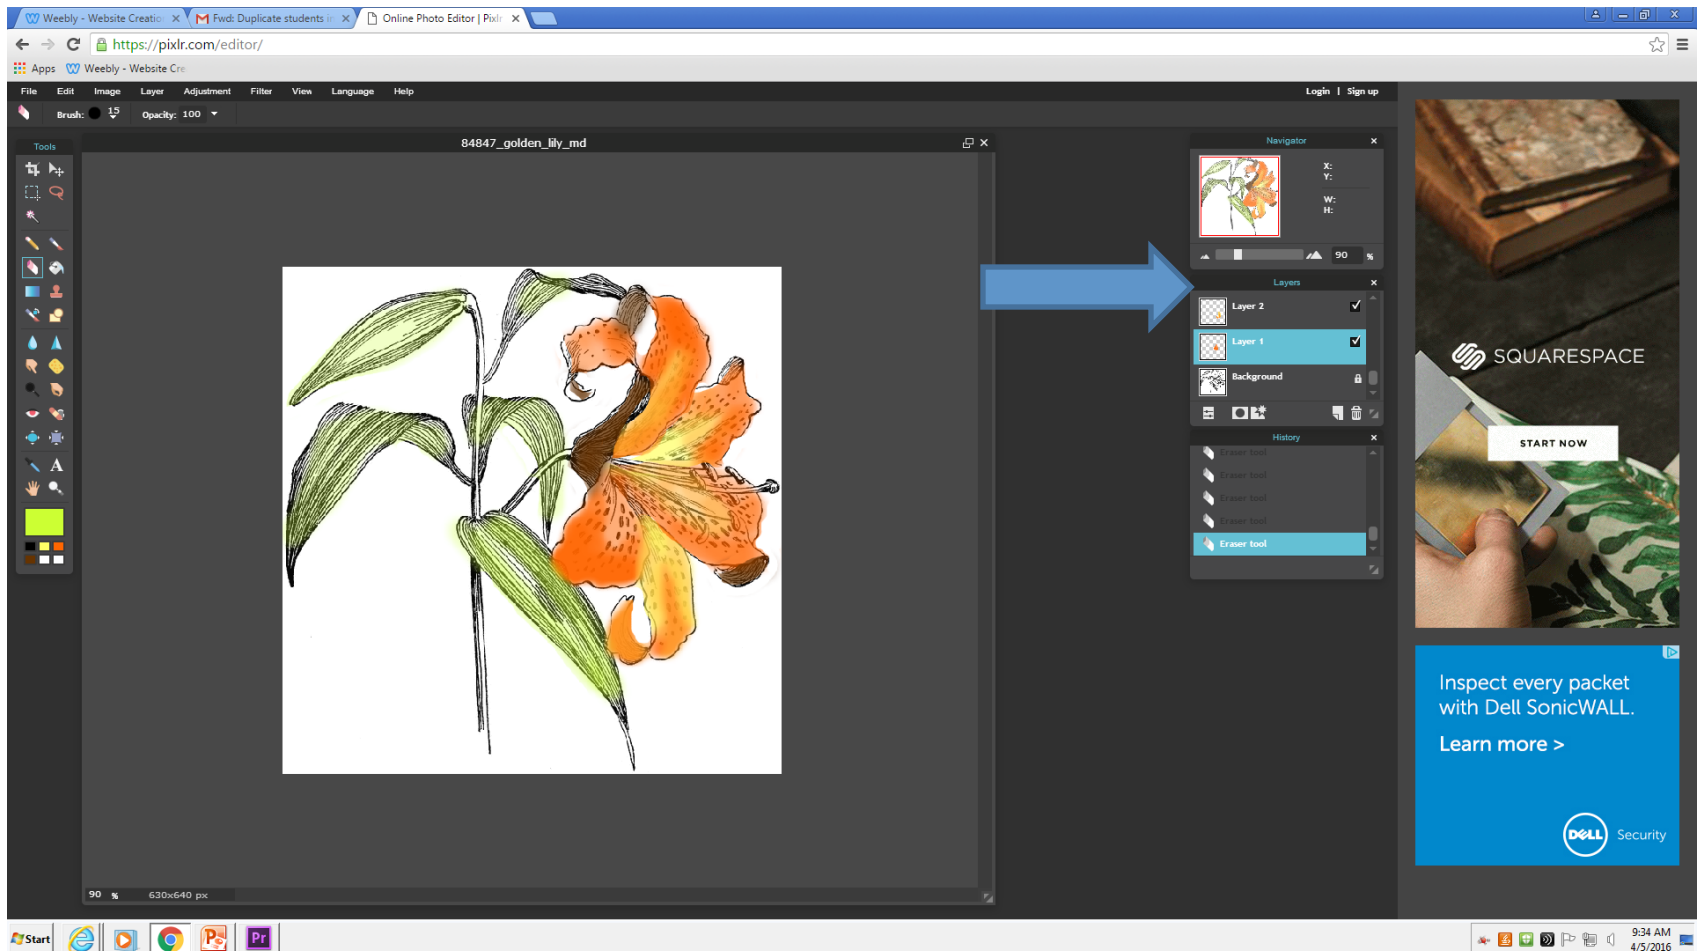

# Choose your eraser and clean up the edges

# Add new layer and paint the next petal until you have painted it all!

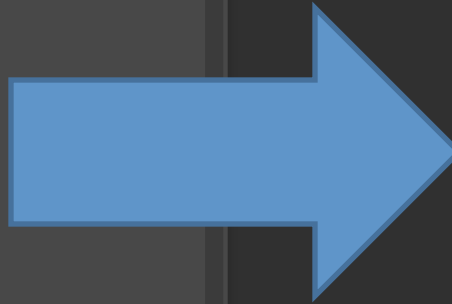

For each painted layer  
click the layer options and choose a layer mode  
(all layers should have the same mode ie  
multiply)
