

# Pixlr Coloring Black and White Photos

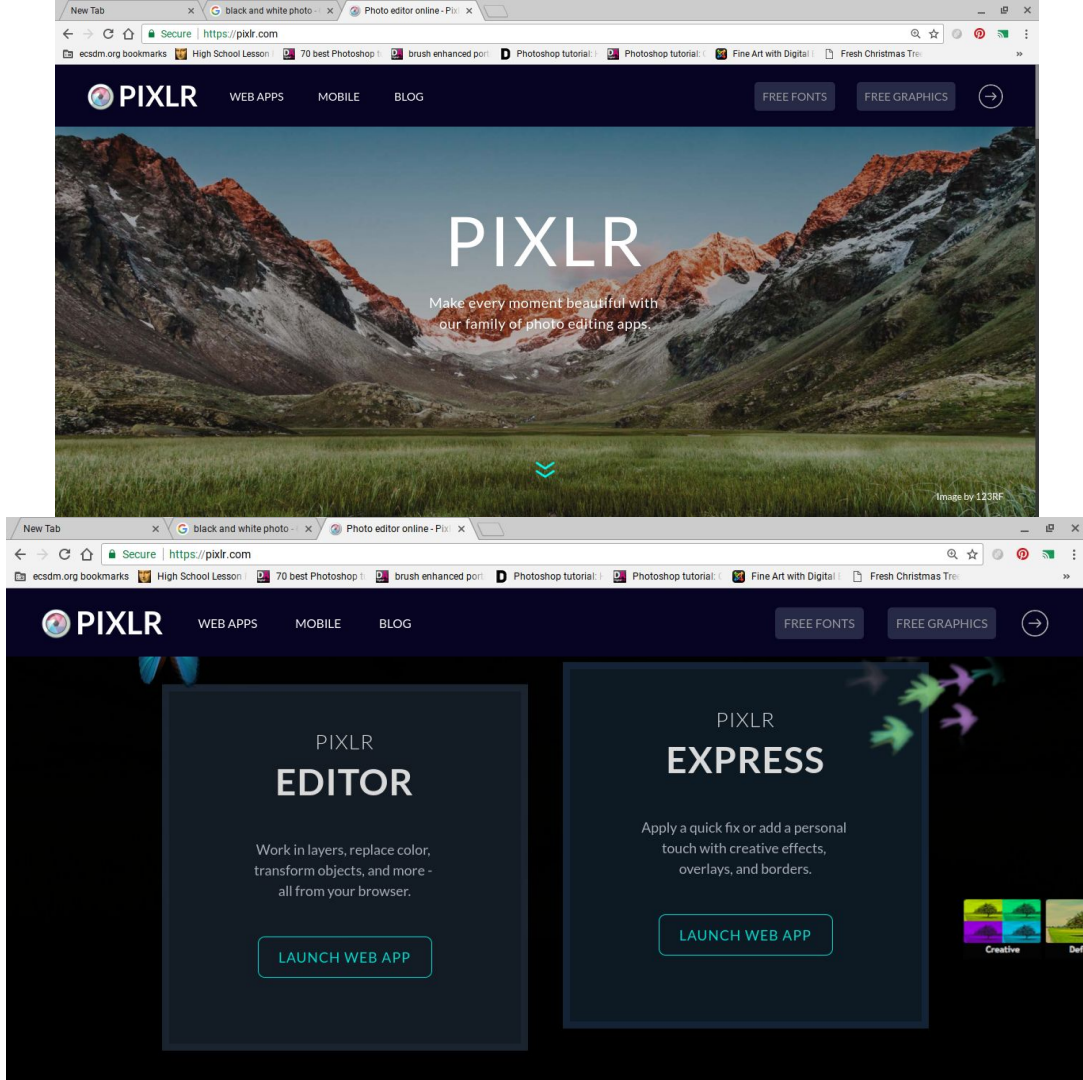

Mrs Ras

Go to google and search and pick a black and white picture  
Right click> save image

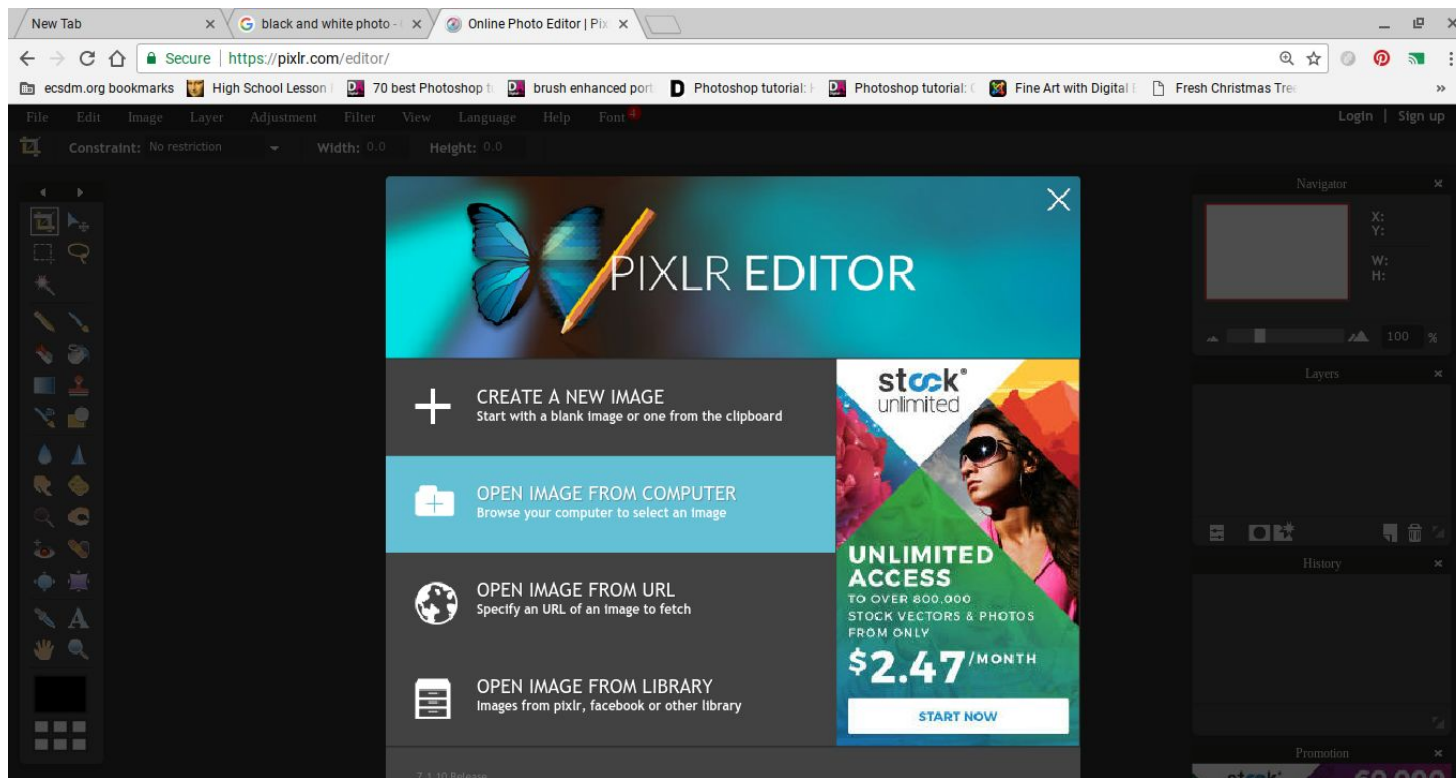

Go to  
<https://www.pixlr.com/>

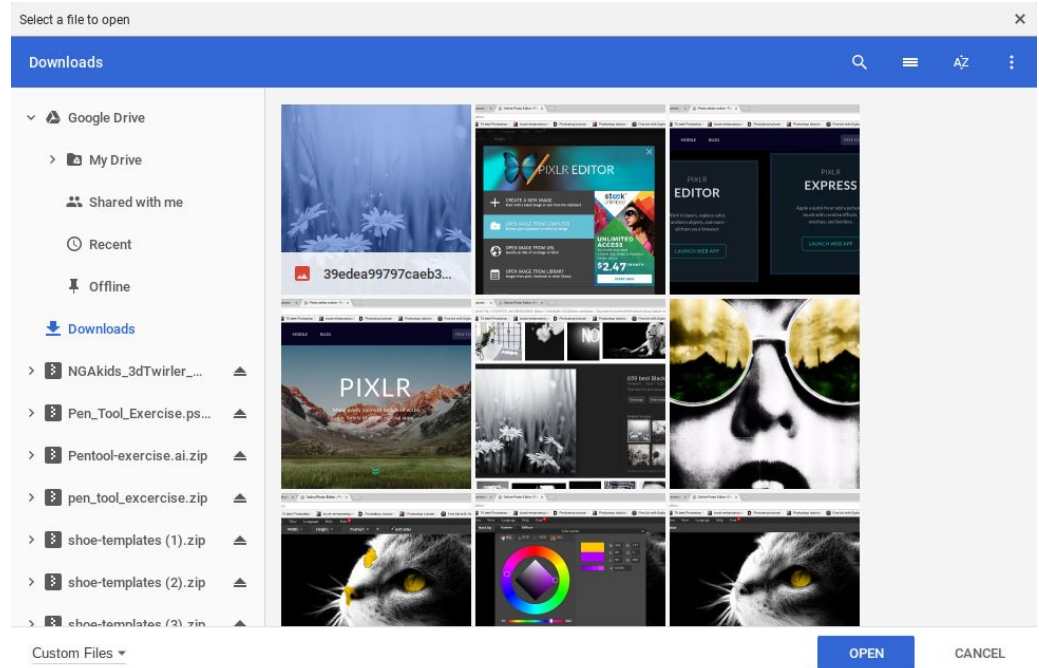

Scroll down and  
launch Pixlr  
Editor

# Open image from computer

Click and open  
The black and white  
photo you saved

Using the magic wand tool and click on the area of the photo you want to color.  
\*hint if the magic wand tool does not select the whole area you want the hold shift and select more. If it selects something you don't want press undo by ctrl z

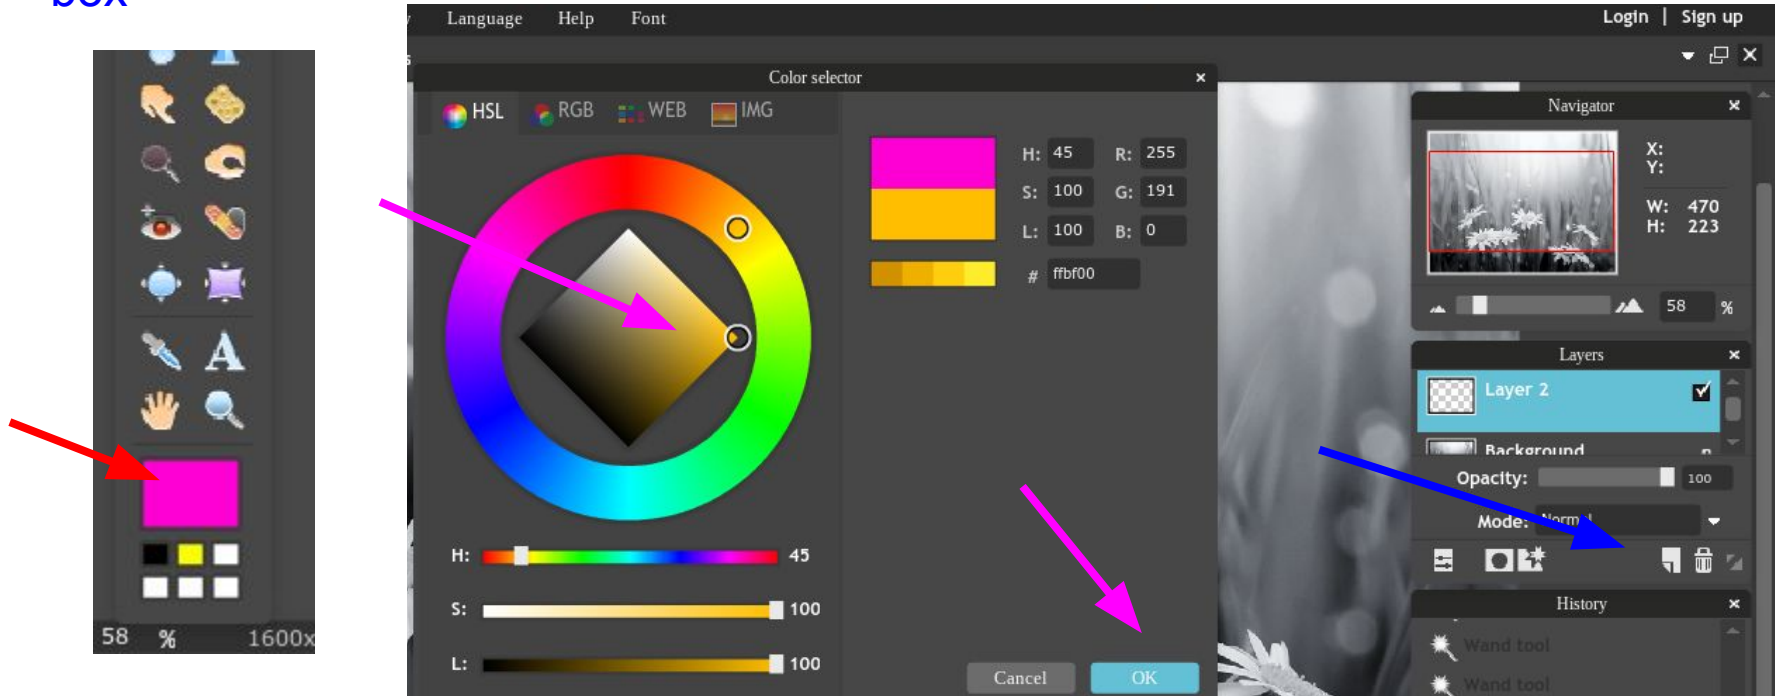

Now we have to get ready to paint.

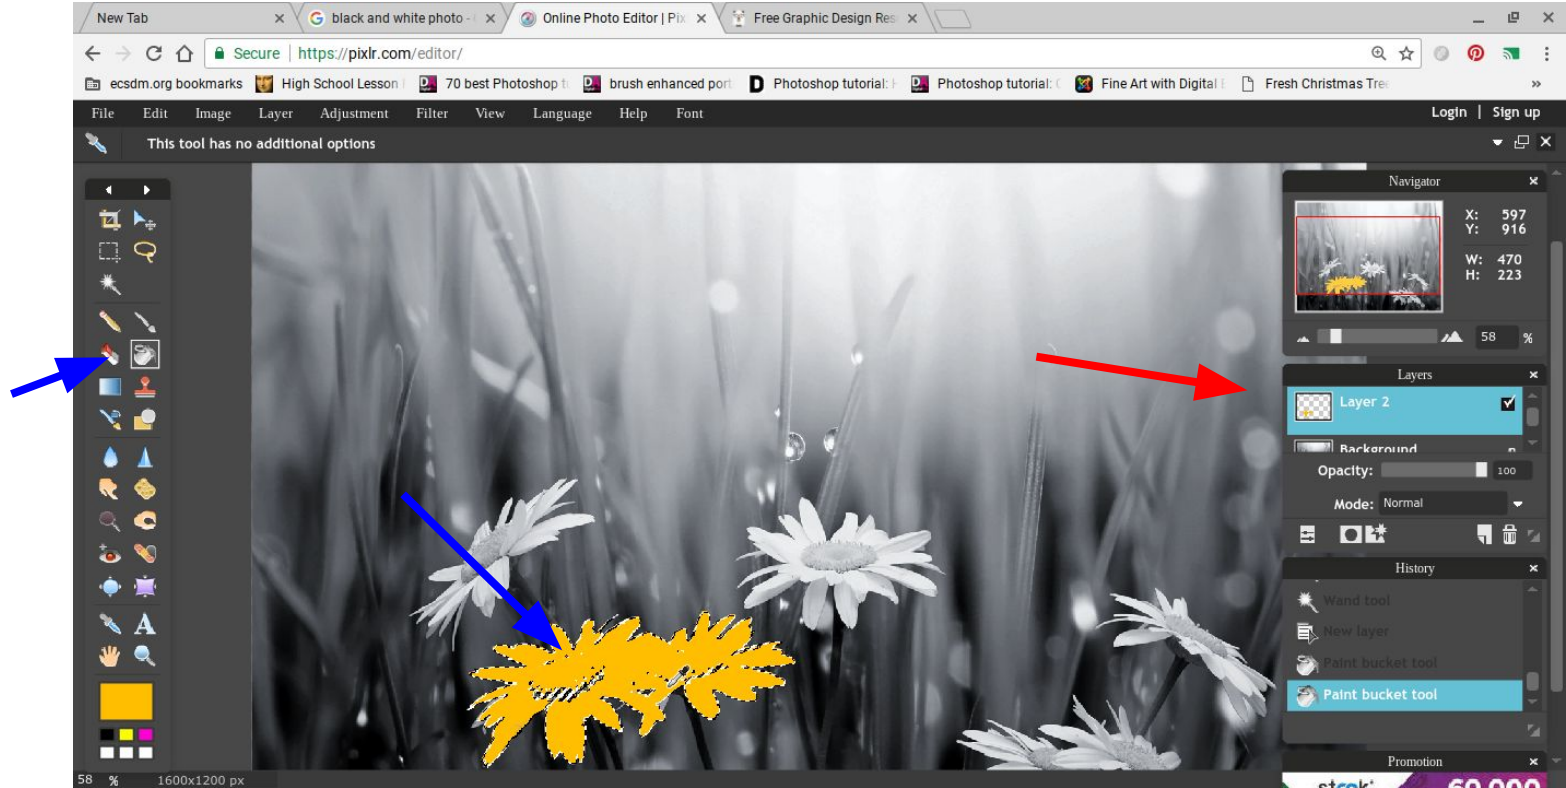

1) Double click on color swatch at the bottom of the tool bar.

2) choose the color you want and press ok

3) add a new layer to paint in. click on the new layer button at the bottom of layer box

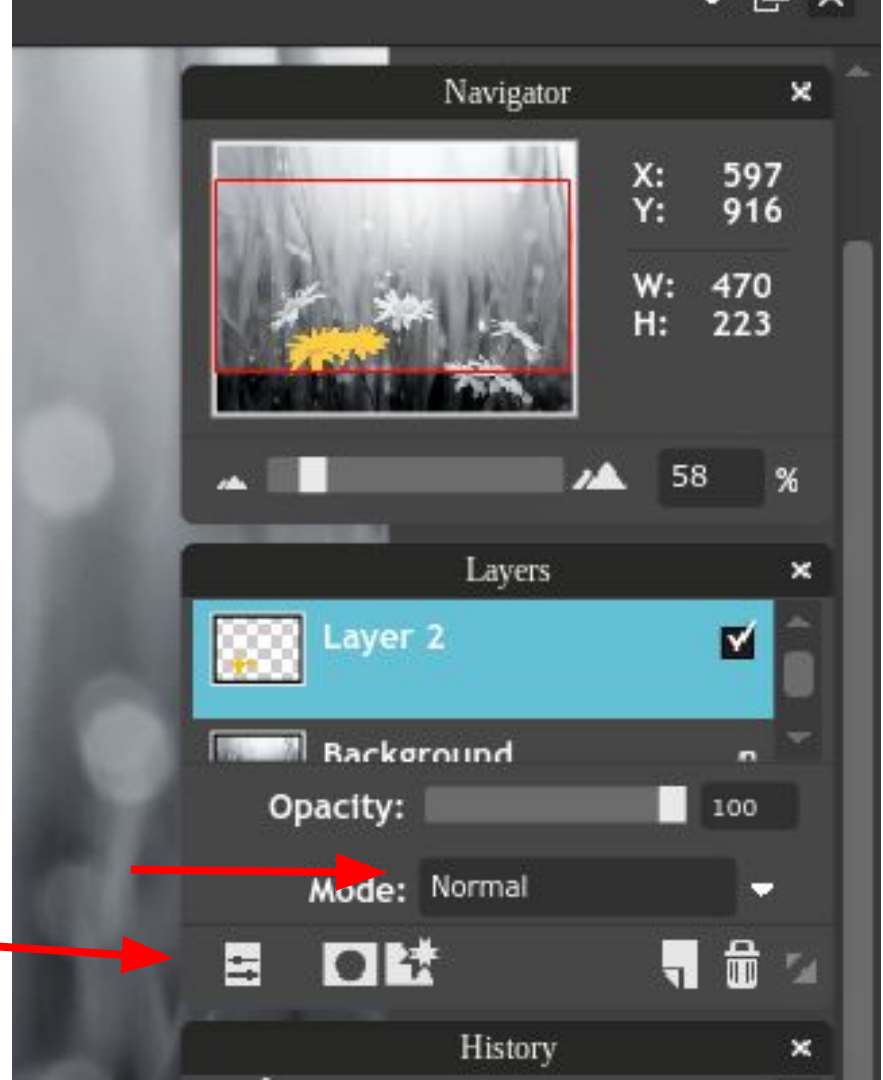

- 1) Make sure you are selected and on the new layer (this is the painting layer are colors will be done in this layer)
- 2) Choose the paint bucket tool and click inside the marching ants to paint in the color

So that you can see  
through your color click on  
the options of the layers

And change the mode  
from normal to Multiply or  
overlay

Select the black and white layer then and choose the magic wand tool and select the next piece you want to color

Continue to select and color. Remember to only color in the new layer and then select things in the black and white layer. You will need to click back and forth

You must have at least 2 different colors and  
At least 5 things colored

On the black and white layer  
adjustment> brightness and contrast  
Enhance the contrast and make a more dynamic pic

# Now save your image File>save

# Save as a jpeg and rename your file

A screenshot of the Pixlr online photo editor interface. The browser address bar shows the URL <https://pixlr.com/editor/>. The main workspace displays a photo of pink and yellow flowers. A "Save image" dialog box is open, showing the "My computer" save location. The "Format" dropdown menu is set to "JPEG (Good for most photos)". The "Name" field contains a long alphanumeric string. The "Size" of the image is 193 KB. The interface includes a top menu bar with options like File, Edit, Image, Layer, Adjustment, Filter, View, Language, Help, and Font. A right sidebar contains a Navigator, Layers panel (showing "Layer 2" and "Background"), and Opacity/Mode settings.

For credit add to your google portfolio!!!
