# Wave *Movement*

What is movement?

- creating art to direct a viewer's eye along a path through the artwork, and/or to show movement, action and direction

- Movement in art shows flow and sometimes repetition.

Wave Movement Project You will try to show movement through creating an ocean and flowing waves.

- go to sumopaint's website
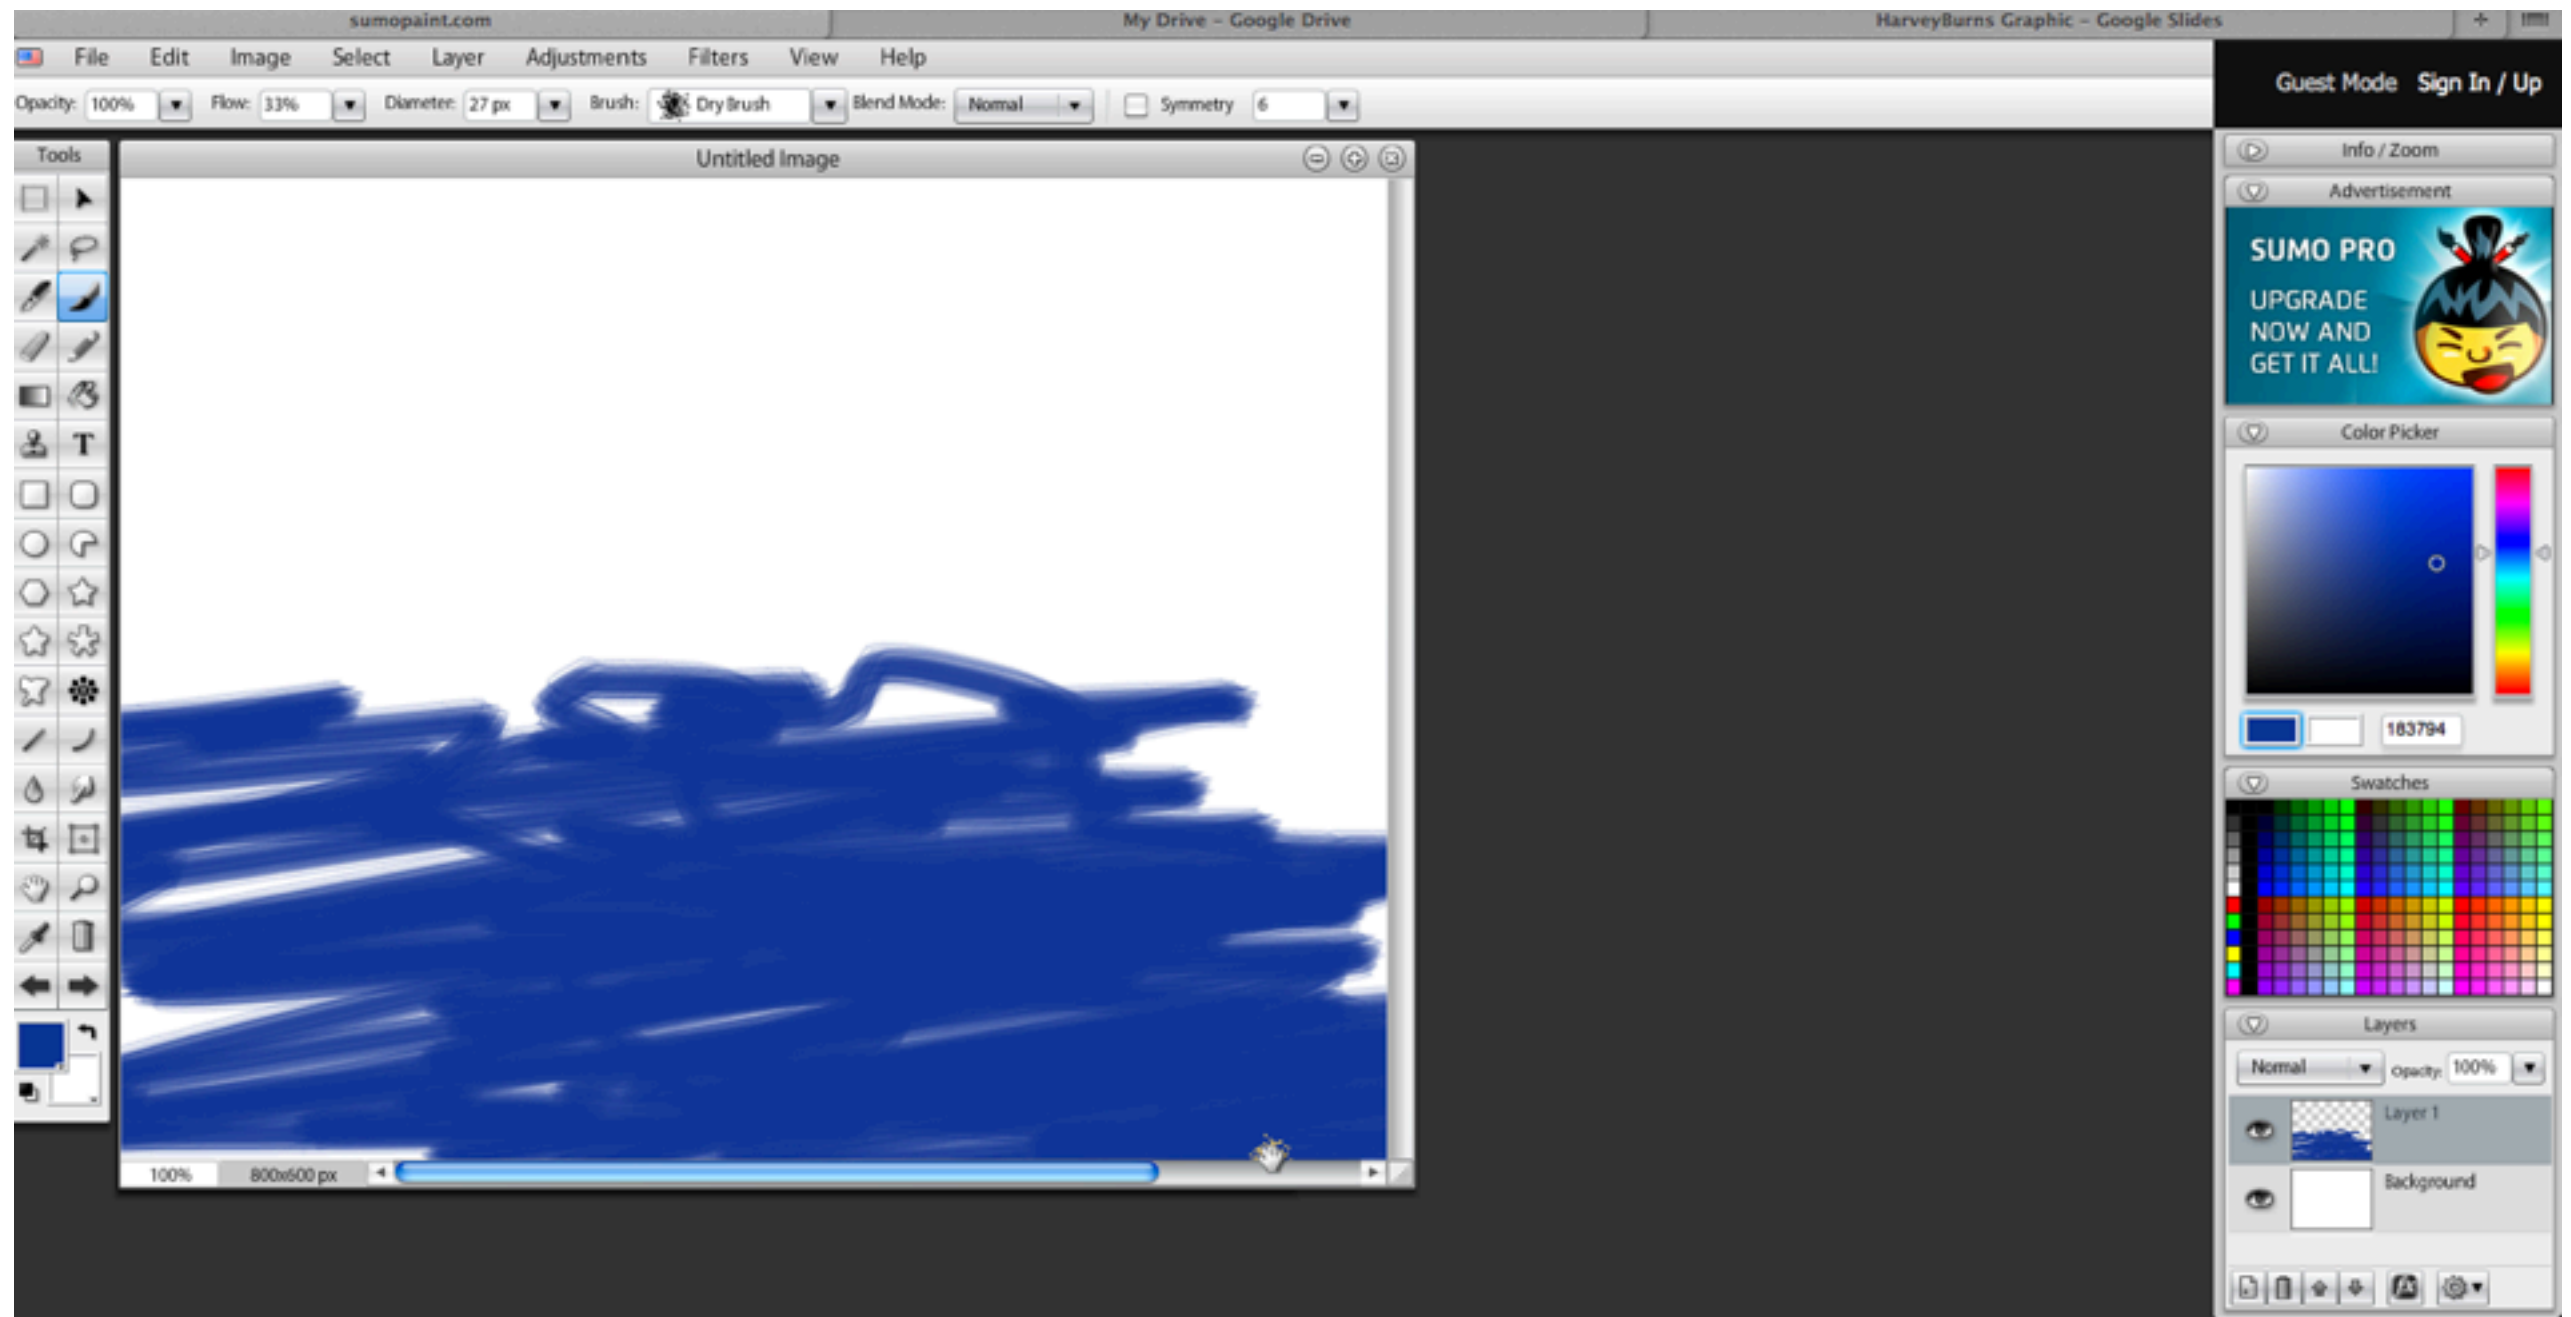

Create a new layer

# choose a color that you want for your wave

Choose the brush tool
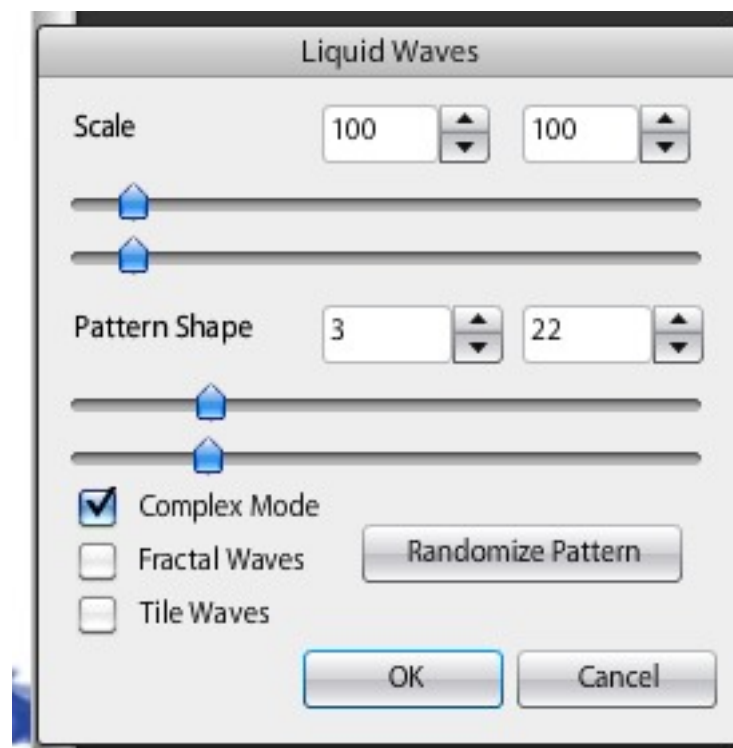

paint along the bottom area.
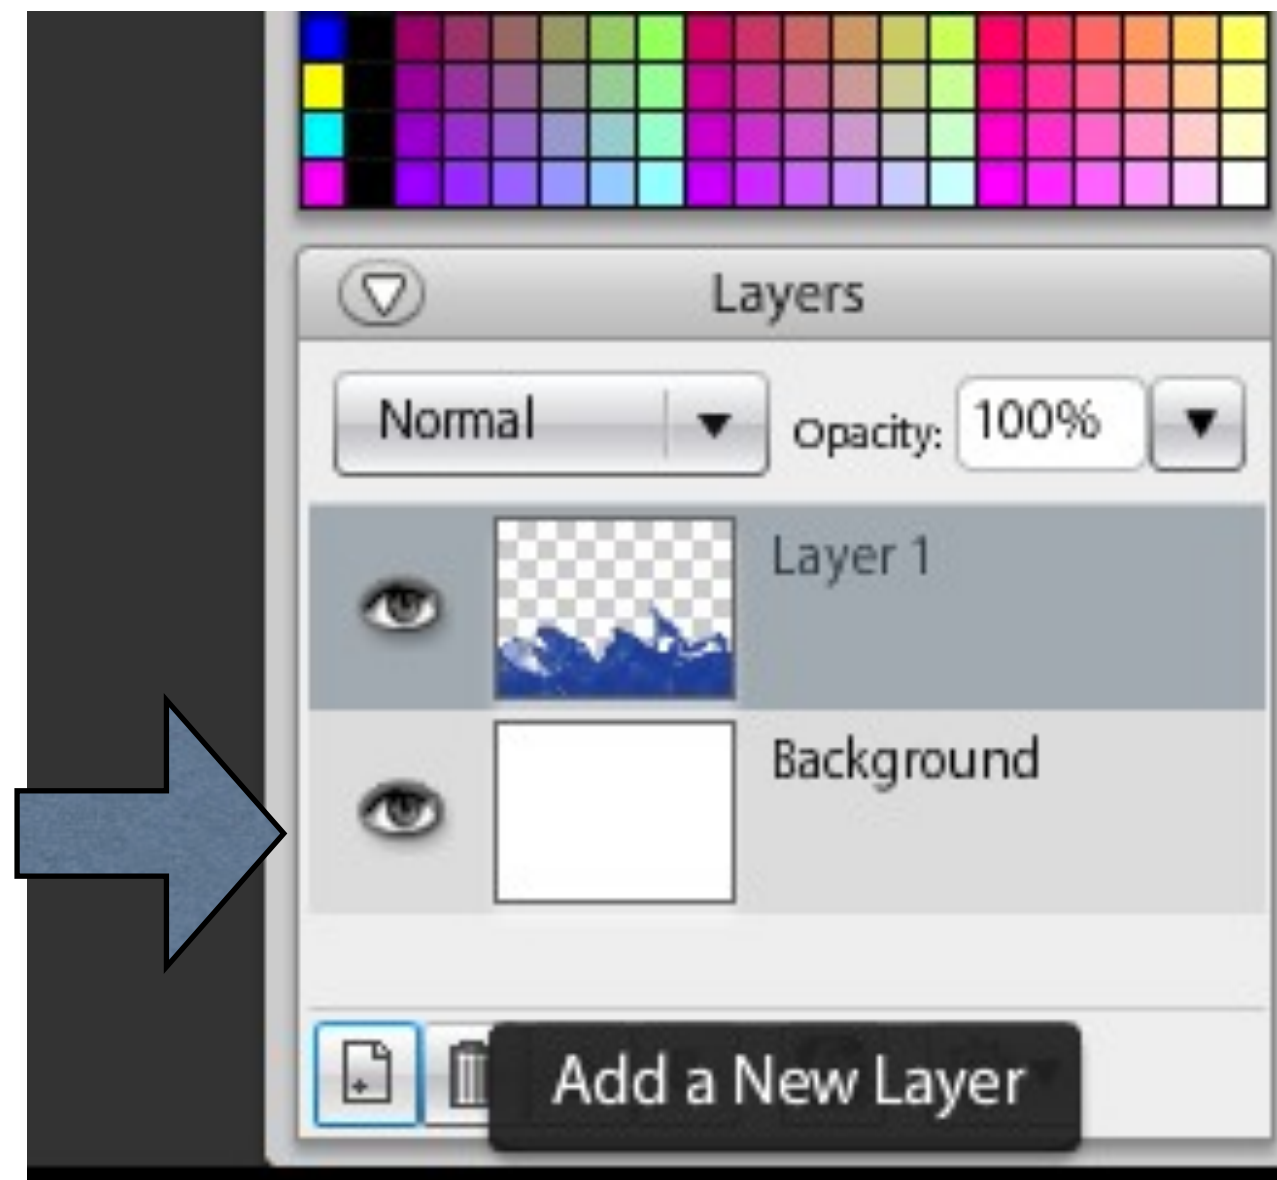

let's create water
# Filter>Distort>Liquid Waves

# Play with the scale until you like the shape then press ok
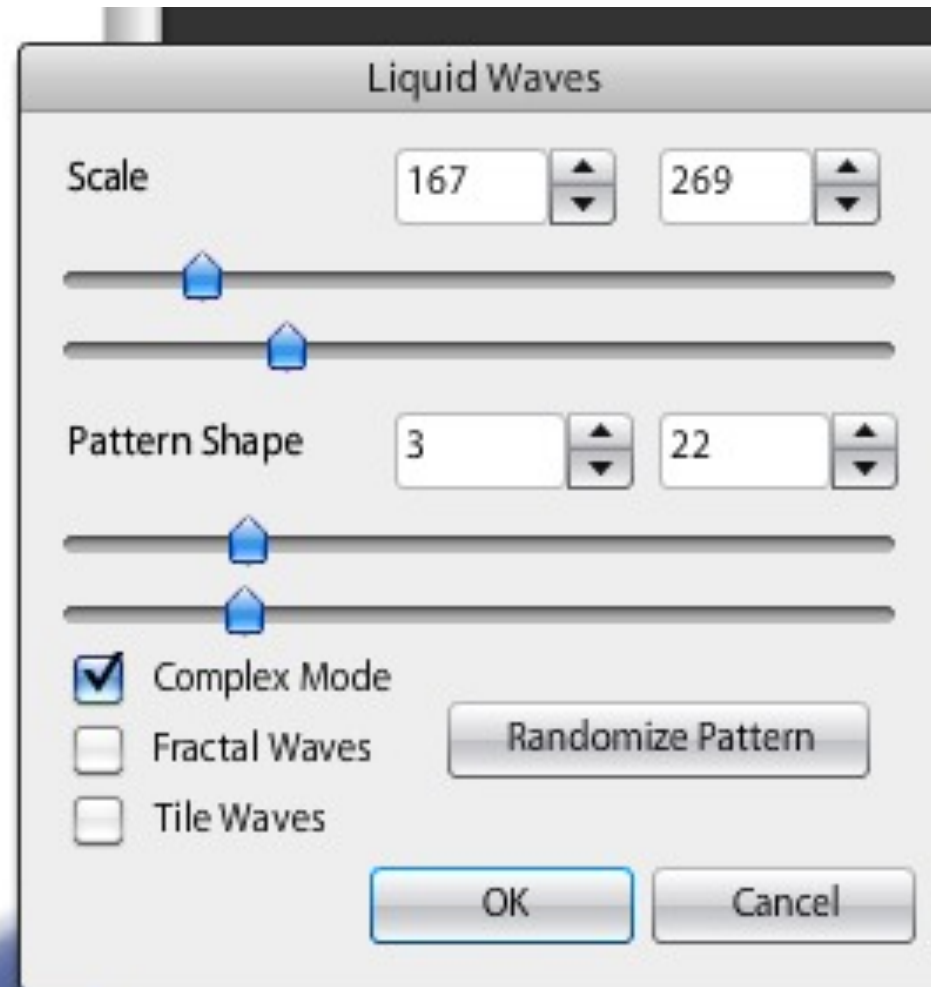

Add a new layer

Now choose your second color, it should be a shade of you first (dark blue, and light blue)
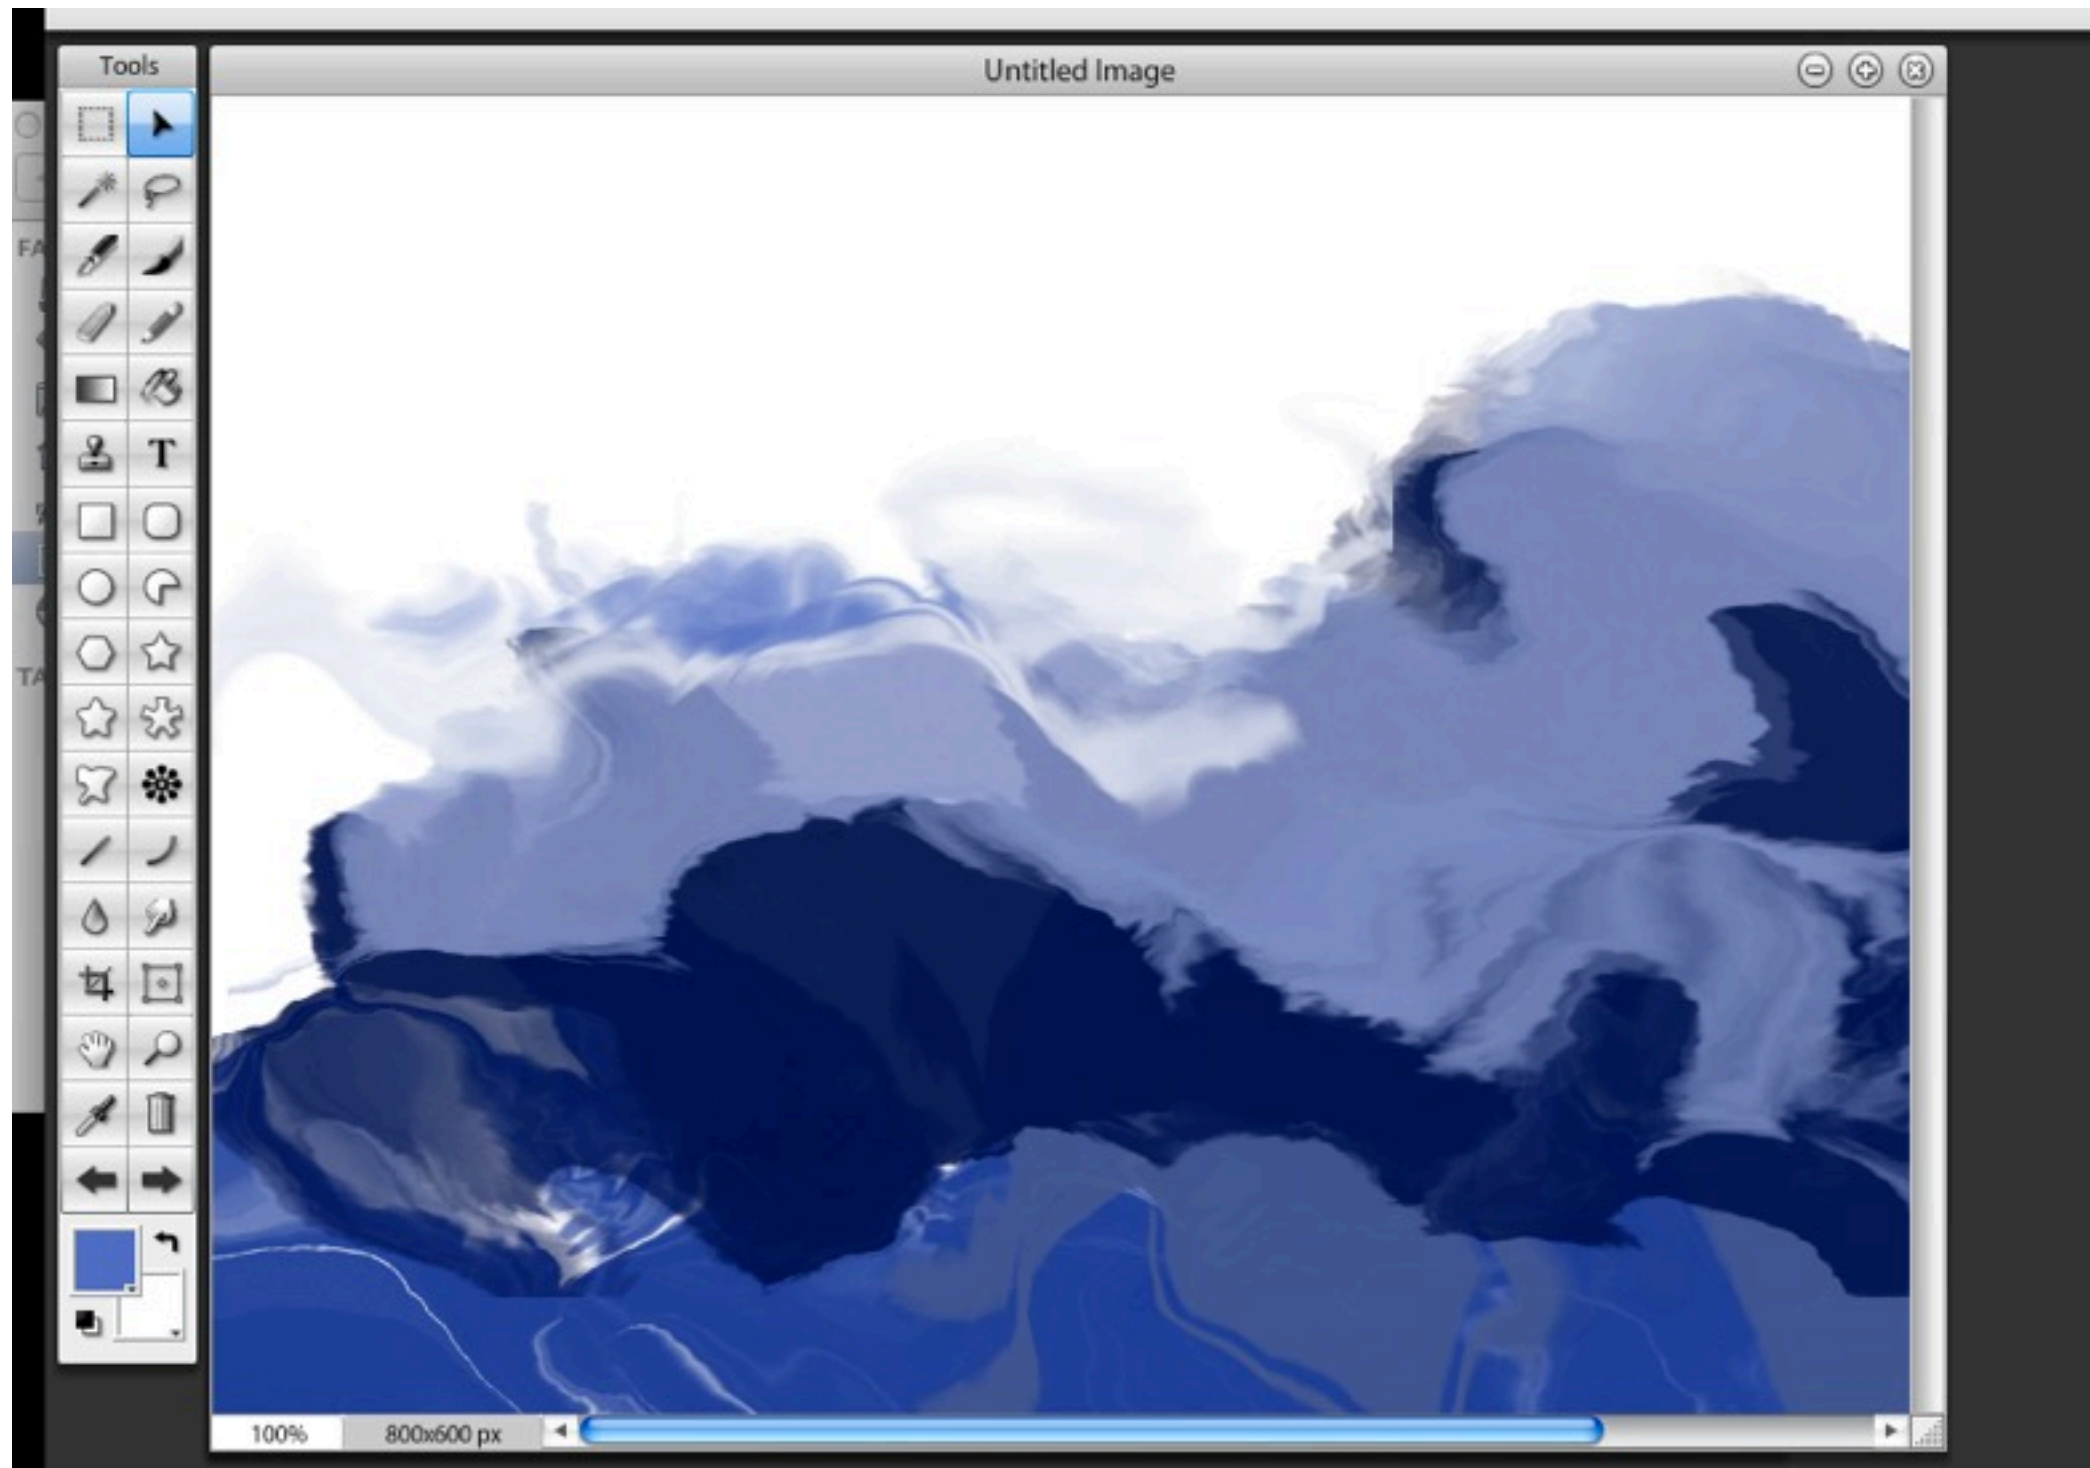

Choose your brush tool and create another coating just above/ on top the last wave
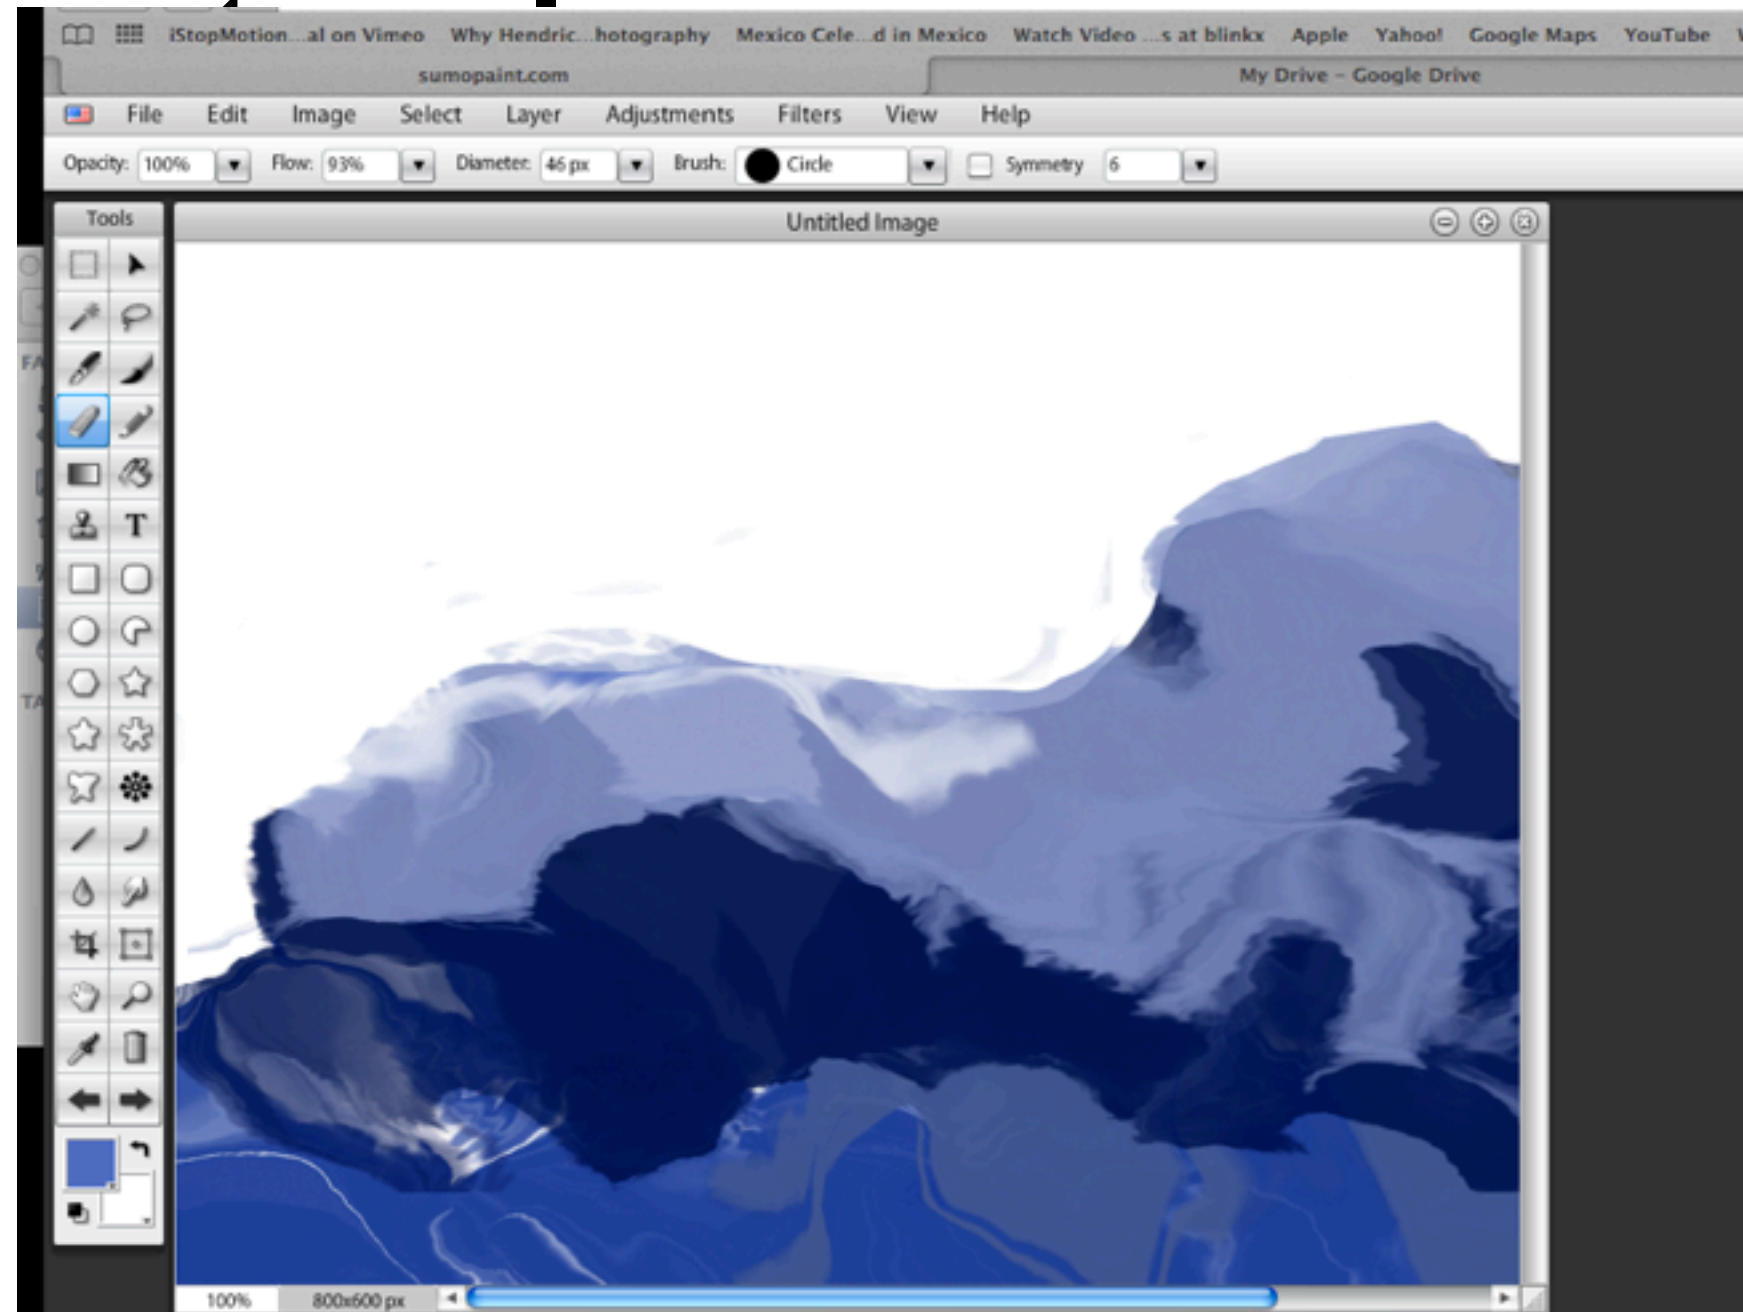

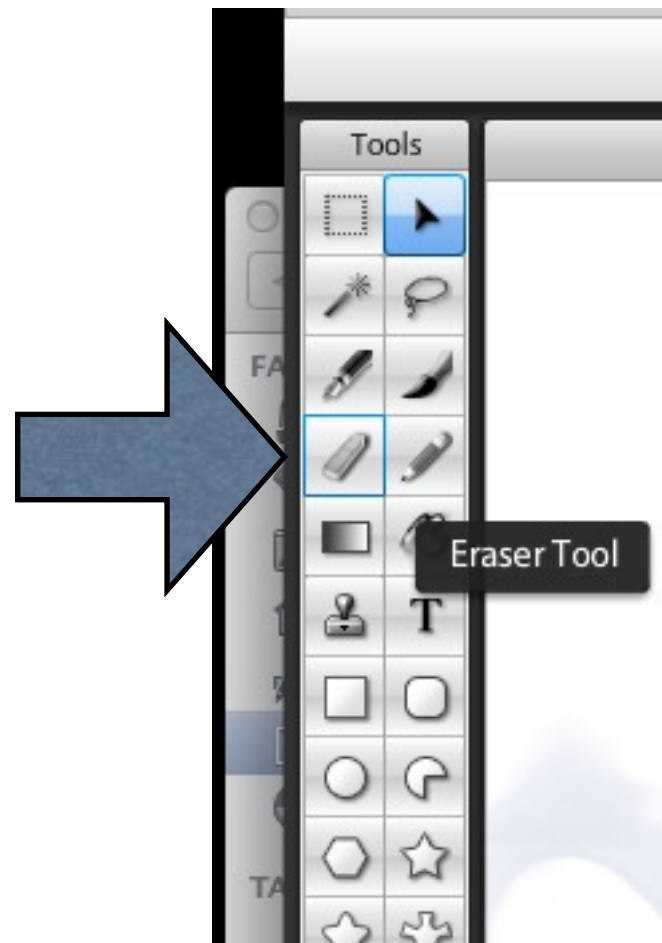

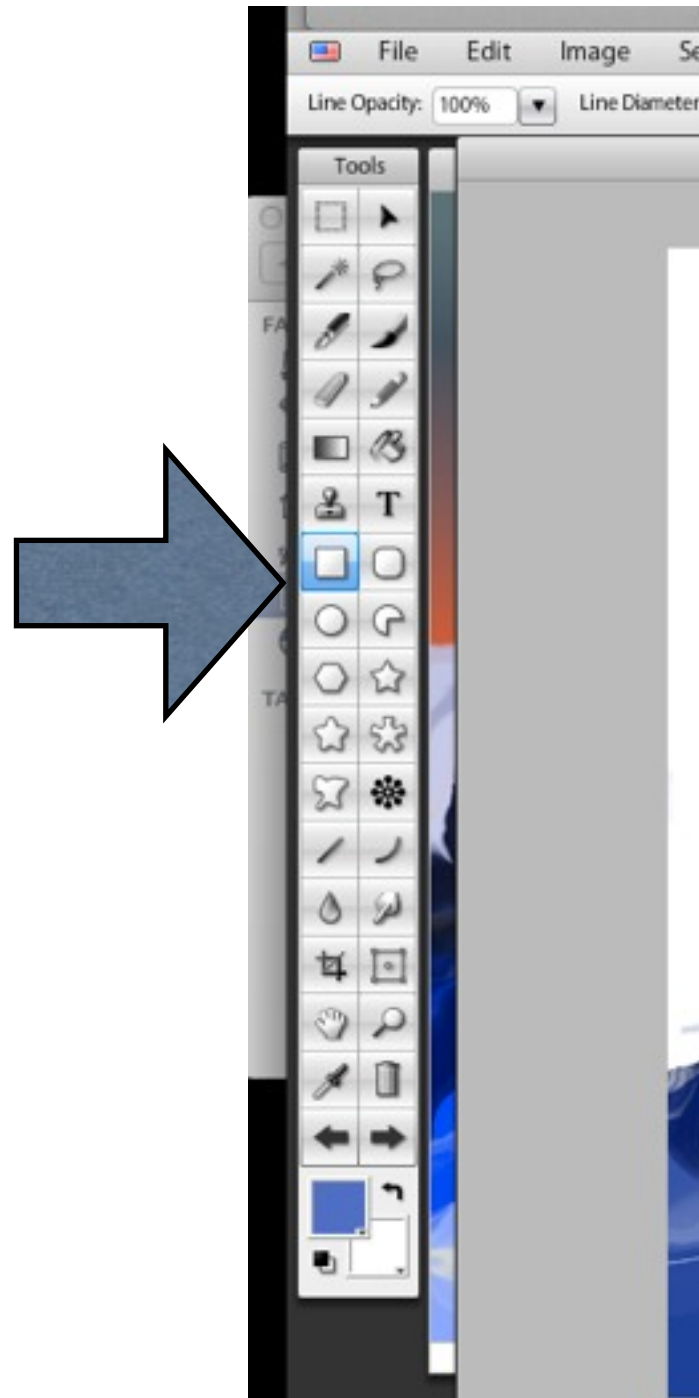

Next apply Liquid waves again

add four more layers of waves (all colors in the same color family ie blue family, purple family etc)
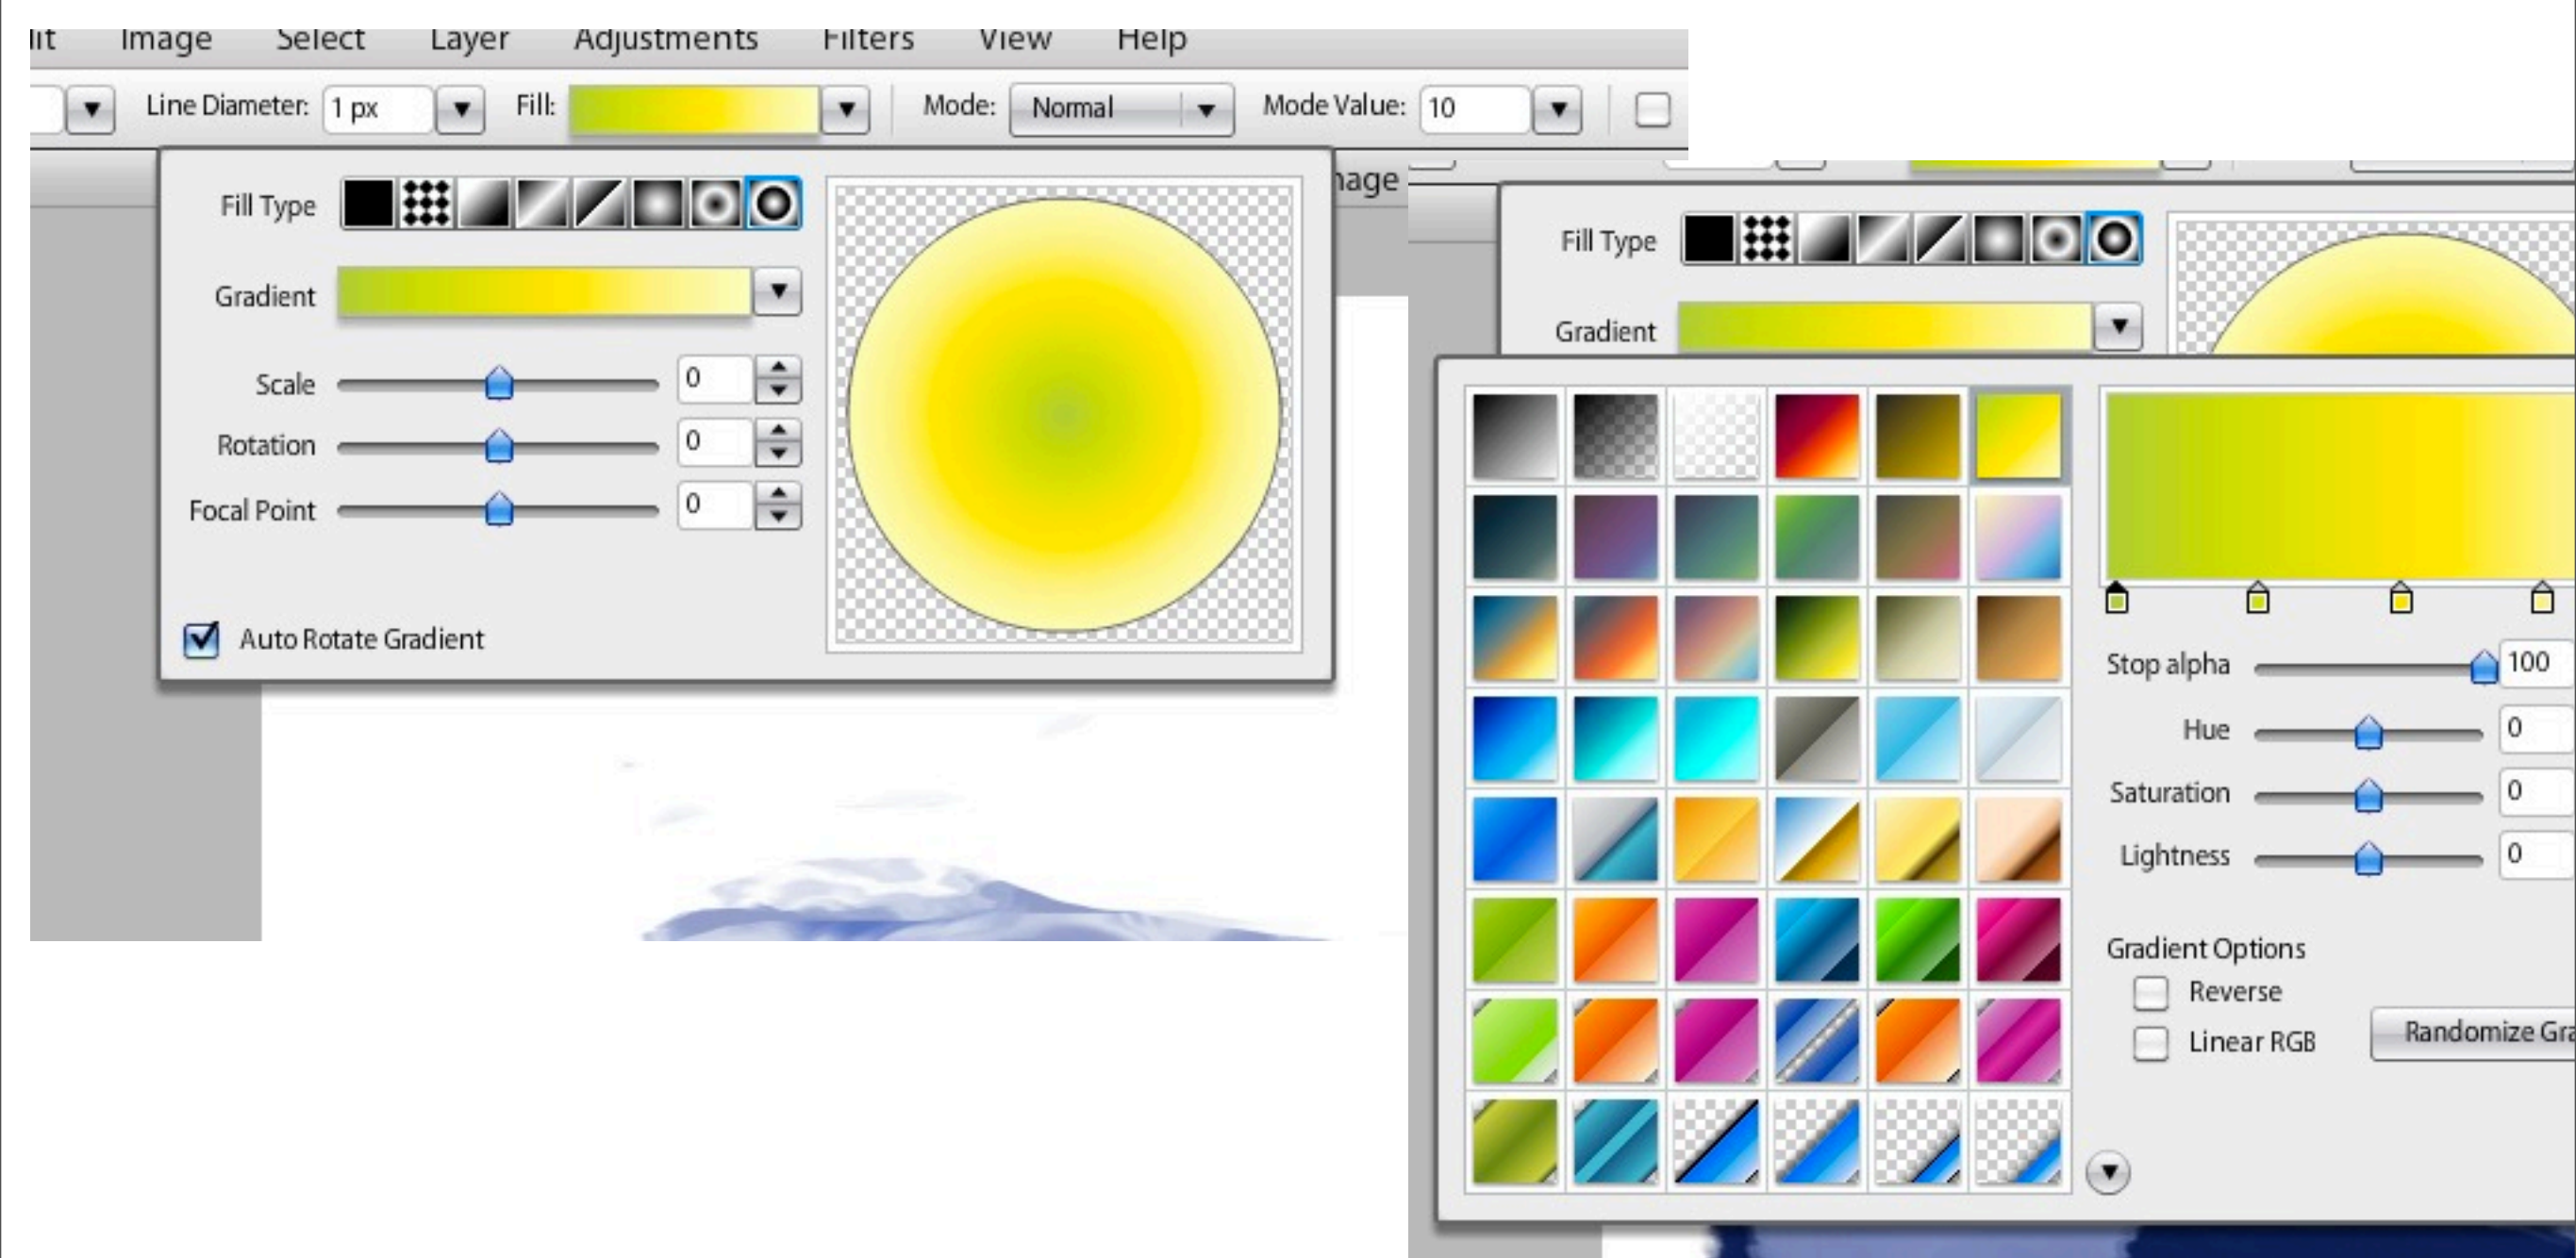

# to smooth the top of the wave use the eraser

select the background layer and select the rectangle tool

choose the gradient for your sky

Drag the rectangle across your whole background

Now save to your computer and then upload it to your google portfolio for credit
